## INTRODUCTION

Medical Astrology is a fascinating, timeless subject of antiquity that has unfortunately lost its value in the wake of chemical (allopathic) medicine. While almost everyone knows his or her astrological Sun sign from their month and date of birth, they are not generally familiar with the personal characteristics associated with it, dietary and hygienic measures to be advised, and even preventative measures it provides to preserve, regain, or maintain one's health. Historically, the two oldest sciences of man's history are astrology and herbalism. In a rare book uncovered from the English archives on medical astrology, it was stated that as late as the 1700's, those who entered the profession as "doctor of medicine," either in England or other European countries, were obligated to pass an astrological examination. And if the candidate was found deficient in the knowledge of medical astrology, the individual was deemed unfit to practice medicine!

The usefulness of medical astrology, today, does not have to be restricted to doctors of medicine. Thanks to computers and the science of astronomy, those who turn their interest into the understanding and application of medical astrology will gain some truly unique insights about themselves and others.

### KEYNOTES TO KEEP IN MIND WHEN READING THIS REPORT

The purpose of medical astrology is to find and prevent conditions and disorders. Just as a doctor will look at a blood chemistry report to gain an insight for diagnosis, so the medical astrologer looks at a birth or nativity map (horoscope) to gain insight as well. The horoscope does not diagnose, rather it helps one understand the constitution of the native (whether strong or weak), the healing potential, the metabolism (whether normal, fast or sluggish), and the pathological tendencies. It provides general insights which are then modified by the native's heredity, early childhood, and environmental factors (weather, climate, exposure to radiation, toxic waste, trauma, accidents, etc.). It also provides an insight into the general psychology of the native and if psychosomatic illness could be present. Further, based on Hindu and Tibetan philosophy, the horoscope can show past life potentials and whether past events have been carried over into this life.

There are many types of astrology and the individual has the freedom to choose that which is of benefit. Predictive astrology deals with mundane factors, like timing events, predicting financial gain or loss, when to start or end events, etc. Judicial astrology deals with positions of the planets with respect to entire populations and was reportedly used by former

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

President Roosevelt. Astro-Meteorology deals with weather forecasting and has been in use since the beginning of man's history and is still reported today in the Almanac. Medical Astrology is, of course, the purpose of this report.

Sometimes you will have a condition or unusual symptom that is not seen in your chart or by this report, but you will generally find the cause. For example, you may have beginning pains in the joints which a homeopath would classify as rheumatic or arthritic in nature. The chart shows Saturn in Libra indicating sluggish kidneys and slowed down filtration of its blood toxins. The arthritic pains come and go depending upon your diet and lifestyle, i.e. when fasting or drinking pure water the native's pains are reduced or eliminated, when eating rich foods, the pains are increased. Thus, the diagnosis is weakened kidneys; the treatment is detoxification, and the long term management is to eat lessened amounts of protein and avoid hard cheeses, hard water, salt, and rich meats which clog the kidneys with protein overload.

**DISCLAIMER:** The information and recommendations presented in this report are based on historical lore and research. It is not intended to dispense specific medical advice or prescribe the use or discontinuance of any medication or drug on the advice of an attending physician. All recommendations herein contained are made without guarantee on the part of the author or company, their agents, and employees. The author and company disclaim all liability in connection with the use of the information and lore presented herein. Information is presented solely as an educational experience for the student of medical astrology.

### WHAT IS MEANT BY ONE'S ASTROLOGICAL SIGN?

As the Earth rotates around the Sun, against the background of the stars of the night sky, its entire circumference is divided into twelve sections of orbital view known as the zodiac. When people refer to their astrological sign, they are merely stating which sign of the zodiac the Sun was in when they were born. This composes a relatively stable frame of reference along a horizontal plane called the ecliptic. The zodiac may be conceived of as a fixed pattern of stars, in twelve divisions of the Earth's orbit.

In dealing with Medical Astrology, we must understand that the twelve signs of the zodiac equate to twelve major parts of the body, each separate part being under the dominion of one of the twelve zodiacal signs. For example, Aries rules over the head and face, Taurus rules over the neck and throat, and Cancer rules over the breasts and chest. The zodiac influences the mode or type of energy of a planet as it travels

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

through the signs. For example, the Sun in the zodiac represents vitality. If in Aries, during the spring, the head region is energized, ideas abound, the outlook is promising. If however, Mars is in Aries as well at that time, the Sun is called "combust" with Martian energy, which translates into dynamic action, if not anger, headaches, and inflammations of any part of the head. This is referred to as planetary action.

Person-centered astrology deals with two essential features:

- a) The basic geometrical structure of the space in which the person was centered at birth.
- b) All celestial bodies which passed through your body and time in ever varying relationships or "aspects", also called planetary angles. In this sense, the individual person is the most important dynamic in terms of relationship to the environment.

The natal chart is fundamental; it is the "promise" given at birth. Progressed planets, as they slowly change through life, set the stage for change--adaptation or maladaptation. The current locations of the planets as they move over positions in your natal chart indicate the type of stress factors that trigger the actual events or illness. Thus, the natal chart is the most important chart with which to begin your studies in medical astrology. It is the core chart on which all interpretations are based.

In terms of health, the first point of reference is to study the Sun's location and its aspects to the other planets. In fire signs, the Sun is at its peak and burns the brightest. Secondly, in air signs the Sun burns well, for if there is no air (Oxygen) there is no fire. The Sun is weak in water signs, especially Cancer and Pisces, as water is more condensed and puts out fire. The earth signs, which represent the densest matter, confer more tenacity than vitality, as they receive and give energy more slowly, as in the burning of coal--it takes eons to form, is hard to light, but once lit, it burns for a long time. The twelve zodiac signs are classified by the following elemental qualities:

Fire - Aries, Leo, Sagittarius

Water - Cancer, Scorpio, Pisces

Air - Gemini, Libra, Aquarius

Earth - Taurus, Virgo, Capricorn

The Moon controls the body's rate of flow; its rhythmic or unrhythmic

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

energy movements. The third important consideration is the Ascendant or location of the sunrise meridian at your time of birth. In the body you have metabolism of cells and organs indicated by the Sun sign and season of the year; the metabolic exchange of nutrients in and toxins out indicated by the Moon sign; and the overall flow of vital energy as indicated by the rising sign.

### **THIS REPORT SEEMS COMPLEX. WHERE DO I BEGIN?**

The first and most important aspect in relation to health is the study of one's own horoscope, and a simple diagnosis of the bodily and constitutional strengths and weaknesses, natural functions, and of the various ailments and disorders shown therein. It is therefore necessary to analyze the various zodiacal and planetary influences of your birth chart, which gives simple and reliable rules for the prescriptions for health and prevention of disease.

The most basic step that must be taken, is to examine the zodiac sign of the Sun, Moon, and the Rising Sign. Their special influences can be analyzed and possible health challenges prevented by simple methods.

In considering the human body from an astrological point of view, we must understand that it is divided into twelve parts. Each of the twelve major parts are under the dominion or "rulership" of one of the twelve zodiac divisions. These are general divisions and organ rulerships which can be mixed with organ functions designated by other signs or house divisions. From this vantage point, we view anatomical location--zodiac sign--as separate from physiological functions--planetary location and aspects.

Utility and diagnosis with a medical chart interpretation entails examining the general tendencies of the health and constitution, to the detailing of specific disorders. First, look at your Sun sign, as it provides the key to your vitality and metabolism. This report will give you the dietary and other lifestyle factors conducive to your solar sign and vitality. So here are the keynotes to keep in mind as you read your Body & Soul astrological profile:

The "Luminaries" (Sun and Moon) are the most important planets in your chart with regards to health. All manifestations of life depend upon the conversion of food into chemicals necessary for energy, structure and function. Essentially, your body is a flow system of nutrients in, and by-products and toxins out. A normal biological flow of ingestion and excretion maintains your balance and homeostasis. The Sun, its energy (prana or ch'i), photons, and light are vital not only for the production of food

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

(photosynthesis), but the conversion inside your cells to obtain the energy necessary for metabolism.

Interruption of either body cycle, ingestion (air, water, light, and nutrients), or excretion (defecation, urination, exhalation, sudorification) disrupts the normal biological flow. Diseases are thus the expression of the battle of the organism against toxins, interruption of excretion phases, and its attempt to counteract or expel them. During the ensuing interruption phases, which are shown by the horoscope, parasitic viruses, bacteria, and fungi enter the field and further complicate the disorder(s). We look at these essential factors in the medical horoscope with regard to health:

**The Sun**, is interpreted by its zodiac sign, location and whether it is afflicted by the malefic planets. These factors indicate overall metabolism, whether normal, fast (afflictions by Mars), or sluggish (afflictions by Saturn). From the Sun sign, knowledge is gained of the types of foods the native should eat, the colors and aromas that enliven one best, and the gemstones and elixirs that can provide energy and longevity. The Sun, according to the season you were born in, indicates your overall metabolic rate.

**The Moon**, is interpreted by its zodiac sign, location and whether it is afflicted by the malefic planets; indicating the flow of lymph, urination and excretion phases. From the Moon sign, insight is gained into the native's ability to detoxify, condition of lymphatic flow, emotional factors for good or for worse, and homeopathics that can offset negative influences.

**Saturn**, the Great Malefic: its location according to sign and house represents the weakest point of the body, where toxins will accumulate and, if afflicted, most certainly shows where a chronic disorder is located. Its nature is cold and constricting, weakening the metabolic powers, and allows toxins to settle and do their damage.

**Uranus**, if afflicted, causes spasm of the blood vessels and a local oxygen deficiency which results in incoordination, a "choking" of endocrine function, faulty autonomic nervous steering (dystonias), and peculiar dyscrasias that must be dealt with by remedial measures. Disturbed erratic function is shown by the zodiac sign in which Uranus is located. If for example, in Cancer, it would indicate periodic breast pains, a stomach that shuts on and off leading to indigestion, heartburn, gas, etc., and menstruation that is normal sometimes and abnormal other times. These afflictions are a bit of a mystery but are usually functional and not organic, and amenable to homeopathics, physical therapy, massage and lifestyle corrections. Uranus afflictions often account for the ongoing life nuisances or complaints that are difficult to diagnose. This is

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

where medical astrology can provide key insights and remedial actions otherwise not available or explainable. The Uranus sign and house location will show where the spasms are most likely to occur.

**Neptune**, if afflicted, indicates lack of physiological tone as its placement by sign and house shows where the vitality or prana is liable to be "leaking" out from the etheric body. Sunlight tends to harden or strengthen the etheric body and prevents this leakage. Therefore the diseases of Neptune tend to be those that arise from living indoors for too long. Neptune rules viral and septic diseases like strep throat, pneumonia, and tuberculosis.

### **WHY IS THE SUN'S POSITION SO IMPORTANT IN ASTROLOGY?**

Without the Sun, there would be no life on Earth. During the twelve months it takes to make one complete orbit around the Sun, the Earth receives life-giving solar rays from continually changing angles against the background of the grand cycle called the zodiac. This cyclical pattern produces the four seasons, also referred to as the four elements previously mentioned. Birth, growth, maturity, and death; the cycle of the seasons is ordained by the Earth's relationship with the Sun, and every individual life upon its surface is in imitation and under control of this pattern.

In judging the health and constitution from the horoscope, however, it is first of all necessary to observe three vital points: The Sun sign, The Ascendant, and the Moon sign. The Sun is the giver of life in the male horoscope, while the Moon is giver of life in the female horoscope. The Ascendant shows the physical constitution and the strengths or weaknesses where one may be prone or susceptible to external influences. These are the preliminary steps a medical astrologer interprets upon face value of one's natal horoscope at the time of birth. Then, as the other planets are viewed from the chart, you can begin to see how a composite analysis is derived.

In regards to the overall vitality and metabolism, we first look at the Sun and its aspects or angular relationships with other planets. The zodiac signs show or "rule" certain organs and tissues, whereas the planets represent the flow of energies, rhythmic or unrhythmic, as they move through these organs and tissues. Rhythmic flows are known as trines and sextiles. Medically speaking, these good aspects--trines and sextiles--are anabolic, they point to good metabolism and exchange of nutrients. Hard aspects are catabolic, indicating organ weakness, immune deficiency, and even predisposition to cancer. Unrhythmic flows are known as "hard aspects" or afflictions--squares, oppositions, and con-

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

junctions. They represent energy that may be blocked or not flowing smoothly, which contributes to the disease process. It paves the way for disorder if certain health rules are not followed. As a result, they denote "Pathological Tendencies" in your interpretation. These are only tendencies, and the purpose of this program is to show you how to offset these tendencies and avoid their influences, be it hereditary or karmic, circumstantial, nutritional and dietary, and whether these influences or afflictions are amenable to treatment by various modalities. The hard aspects also show certain nutritional factors or deficiencies that can be followed to offset the afflictions of the hard aspects. All of these are detailed for you in your report. You may simply obtain these vitamin and mineral supplements from the health food store. Instructions for use can be provided from a nutritional consultant or doctor.

The planet in aspect determines or signifies the flow of energy as follows:

**SATURN:** The great afflictor, stasis, coldness, sluggish action, hypo function, retention and deposition of toxins. The Saturn location represents where your toxic organ(s) exist. When in hard aspect to the Sun, your metabolic fires are dampened and need to be raised by correct diet, exercise, proper climate to live in, vitamins, etc. When in hard aspect to the Moon, it indicates coldness, lymphatic stasis, puffiness, etc.

**MARS:** Inflammations, irritations, acute illnesses, throwing off of disease toxins. Your Mars location represents where your year to year irritations and accidents are found. In hard aspect to the Sun, your metabolic fires are in overdrive, and need to be moderated by a cooling, vegetarian diet, swimming and bathing in cool water, and other forms of cooling and moderating modalities.

**URANUS:** Erratic actions, autonomic nerve dysfunction, and spasm. Your Uranus location determines which organs are in spasm, and need remedial correction as in physical therapy, massage, chiropractic, acupuncture, etc. The Uranus location shows where oxygen is most needed and the native is improved by proper breathing, yoga, ch'i kung, or even oxygen therapies (ozone).

**NEPTUNE:** Atonias, atrophy, dropped organs, mystery/undiagnosed illnesses; sub-oxygenation, a leaking of vital energy due to emotions. The Neptune location shows where your body may break down the easiest as you get older.

There are three levels of affliction as follows:

1. When there are hard aspects to the Sun there are definite weak-

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

nesses, if not overt illness.

2. A malefic planet in retrograde is a point of tension in the chart. If the planet is free of hard aspects to the Sun or Moon, but retrograde, we consider this a minor level of affliction. It may not be active, but can be activated by improper lifestyle, progressed or transiting planetary positions which serve as the trigger for breakdown.

3. No hard aspects or easy aspects (trines, sextiles, semisextiles, etc.) may indicate a lingering weakness that must be attended to as the native gets older.

### **WHY IS MY MOON SIGN IMPORTANT?**

The Sun indicates constitutional vigor and metabolism, while the Moon's sign and aspects show the flow of vital force as well as the body's fluids, blood and lymph. A disturbed flow, therefore, shows some forms of functional illnesses, particularly those caused or precipitated during the early years of life. The Moon also shows the habits that were formed early in life that now represent disease patterns, such as oral fixations that now translate into overeating or smoking, food preferences that become food addictions or allergies.

The Moon sign also shows talents from past lives. These are proclivities that enable you to easily become proficient in certain areas. They are also your line of least resistance, offering little opportunity for soul growth. The Moon's nodes represent the karma carried over from your last life and the challenges that are present for your soul's growth or hindrance.

Moon diseases today predominate the health chart and can be related to eye disorders, putrefaction of the bowels, autointoxication, and disorders of the breasts, womb, and stomach. Moon forces harden and crystallize the body with age. Moon dominated persons are inconstant, restless, changeable, and variable, and succumb easily to infectious illnesses, colds and flu. Hard aspects show an inclination to little or no exercise. Moon diseases may be prevalent in those who engage in negative thoughts, have a toxic diet, or have other bad habits. The less afflictions in the female nativity, the better a chance of a long and prosperous life.

### **HOW DO I BEGIN TO STUDY MY BODY & SOUL PROFILE?**

Basically, an interpretation starts with general information and then leads to specifics. General information should be studied by anyone with an interest in astrology or health, specifics are studied by students of medical

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

astrology, or by doctors wishing to treat specific health complaints. Like any scientific subject, there is no end to study and detail, yet in astrology there is always "light at the end of the tunnel."

Start your studies as follows:

- a) Sun sign - keynotes for vitality and things you can do to increase it.
- b) Moon sign - keynotes of your emotional nature and things you can do to make yourself more in line with your Sun sign, by controlling emotions to have less effect on your mind and health.
- c) Ascendant - It has been stated by some that your Sun sign is where you should be directed now, while your Ascendant is the place your soul is headed to improve your spiritual progress in life tomorrow and in the next life.

### **EXPLAIN THE ASTROLOGICAL TRAITS**

Some traits are shared by certain signs or houses. This may seem confusing unless you understand how traits are classified astrologically. One classification, known as Elements, which divides the twelve signs into four groups: Fire, Earth, Air and Water. The other classification, known as Qualities, relates to movement, and divides the twelve signs into three groups: Cardinal signs (Aries, Cancer, Libra, Capricorn), Fixed signs (Taurus, Leo, Scorpio, Aquarius), and Mutable signs (Gemini, Virgo, Sagittarius, Pisces). The qualities tend to outline general features or problems. For example, afflictions in the cardinal signs indicate gastrointestinal and kidney problems, in other words, problems with elimination. Afflictions in the fixed signs tend to be stubborn and chronic, and center on heart and cardiovascular diseases. Afflictions in the mutable signs tend to be acute and short lived, and are nervous and respiratory in nature.

### **WHAT ARE THE MEDICAL DIFFERENCES BETWEEN ZODIAC SIGNS AND HOUSES?**

The signs represent where the disease potential is present by "anatomical rulerships" of the body's organs and tissue systems. The houses represent conditions that come from the outside environment, or how certain illnesses develop.

### **WHAT ARE THE PLANETARY "HARD ASPECTS"?**

The planets indicate the movement of energies and forces within your

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

body, e.g. the Sun ruling metabolic fires, the Moon ruling movement of body fluids, Saturn ruling pathological deposits, Jupiter ruling the body's fat and sugar stores, Mercury ruling the movement of nerve and mental forces, etc. Hard Aspects are angular relationships that denote tension or blockage of energy as was occurring at your time of birth. It represents the promise or tendency of energy and fluid movement patterns you are endowed with at birth. The hard aspects are the potential for disease and are called "afflictions". They are known as the Opposition (180°), the Square (90°), the Conjunction (0°), and the Quincunx or Inconjunct (150°).

### HOW DOES ASTROLOGY RELATE TO KARMA?

Astrology is the study of cycles and behavior patterns in individuals that repeat themselves. "Karma" is a Hindu term that literally means "motion" which, when initiated, follows a destiny or cycle of duration. Included in those cycles are reactions, responses, and consequences to the initial energy or desire which put it into effect. These cycles coincide with universal energy patterns represented by planetary and celestial motions of which Astrology constitutes its study of cause and effect. According to the American College Dictionary, karma is "the cosmic operation of retributive justice, according to which one's status in life is determined by his deeds in a previous incarnation. . . the doctrine of inevitable consequence." Thus, karma is the result of desire, actions, reactions and consequences applied to the human condition. It is a cycle of motion due to energies set forth by passion.

The North and South Nodes are important karmic placements in your chart. You may find a weakness in the body part denoted by the sign of the South Node. Often this is an area of the body that requires cosmetic attention or embarrassment. Check both the house location and zodiac sign and the body parts they rule as follows:

SIGN/HOUSE - Corresponding body areas

ARIES/FIRST HOUSE - Head

TAURUS/SECOND HOUSE - Throat and neck

GEMINI/THIRD HOUSE - Arms, hands, lungs, nerves

CANCER/FOURTH HOUSE - Stomach, breasts, thorax

LEO/FIFTH HOUSE - Heart, spine and back

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

VIRGO/SIXTH HOUSE - Intestines, digestion

LIBRA/SEVENTH HOUSE - Kidneys

SCORPIO/EIGHTH HOUSE - Colon, sex organs, lower back

SAGITTARIUS/NINTH HOUSE - Hips, thighs

CAPRICORN/TENTH HOUSE - Skin, knees, bones

AQUARIUS/ELEVENTH HOUSE - Circulation, blood, legs

PISCES/TWELFTH HOUSE - Feet

The Astrological Chart shows one's mind patterns (Sun sign and Ascendant), our past conditioning (Moon nodes), and our emotional (Moon sign) patterns. The chart reveals what we are now--because of what we have thought (12th house) and done (planetary locations) in the past. In the interpretation of the Body & Soul chart, most any factor can be regarded as having karmic associations. For example, the location of Saturn, often called the "Lord of Karma" is said by many astrologers to represent the major karmic problem in any individual's life. The sign and house position, and aspects, reveal where we meet most of life's specific tests, with its pain, illness, and frustrations. Saturn shows where our difficult karma comes into focus.

The Moon sign in karmic astrology represents a general reflection of what we have been in the past. It is an image of assimilated experience and behavior patterns with which we now feel comfortable. The Moon, according to sign and location, shows karmic emotional patterns which either inhibit or help us in our attempts at self-expression and adjustment to the outer world. If the planetary aspects to the Moon are harmonious (trine 120°, sextile 60°, or semi-sextile 30°), past lifetimes and conditioning help one to adjust to life. If the Moon aspects are hard (opposition 180°, square 90°, semi-square 45°, and quincunx 150°), it represents an inability to adjust oneself easily to life, or there is a negative self-image. In this case emotions must be outgrown and transformed. Hard lunar aspects show emotional blockages which are particularly active in childhood and adolescence. The house position of the Moon shows where one needs to see oneself more objectively, where one can tune in to find tranquillity.

Some examples may help clarify this point. If the predominance of planets (particularly those that are in hard aspect), are located in water, there is a need to refine one's emotions and mode of emotional expres-

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

sion. There is also a need for emotional discipline as the emotions flow easily from the astral body and are readily sensed and perhaps misinterpreted by others. If the stressed planets are in fire signs, there is a need to control one's impulsiveness and egocentric behavior and to develop love, sensitivity, and patience. If the stressed planets are in air signs, the individual needs to discipline the thought processes, not only how one thinks (erratically and nervously) but also the manner in which thoughts are expressed to others. Fantasies, day-dreaming, intellectual escapism and unrealistic schemes need to be moderated into the habit of rationalization and purpose. If the stressed planets are in earth signs, there is too much attachment to the physical senses, comforts, and possessions. The native must come to terms with what will really and truly provide the deep security he or she longs for. As one spiritual teacher most aptly stated, "karma is attachment." The birth chart shows our attachments and attunements, and hence our karma.

#### **HOW DOES ONE IMMEDIATELY BENEFIT FROM THIS REPORT?**

One can spend years of study learning about themselves from the factors generated in this report. But let's begin by pointing out a few of the pertinent areas:

**SUN SIGN:** Your Sun sign will give you key dietary pointers that you can and should implement now. The foods that are compatible for your constitution are listed. Bach Flower Essences according to your Sun sign are also periodically helpful during times of stress. The Homeopathic Cell Salt will also be of benefit and can be readily purchased at a health food store. Take 3 tablets daily for one week and then take once weekly as a tonic for one year as a course of treatment.

**MOON SIGN:** In this report you will find your emotional proclivities and the lines of least resistance with regard to behavior. Counter the stress factors that you find in this report. Learn to moderate or eliminate those negative emotions. Benefiting foods will be listed that will help regain or maintain your vital circulation of bodily fluids. Eat them on a regular basis and remember the Greek Dietary Rule: never eat the same food twice in the same day! This helps prevent allergies to those things you have come to crave or desire.

A Rashi Homeopathic Mixture is also suggested. This is a Hindu formula that will help offset lymphatic stasis and other undesirable lunar tendencies based on your Moon sign.

**MERCURY SIGN:** This sign shows how your nervous system reacts with your brain and how vitality is distributed throughout your body. Listed will

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

be recommended herbs and spices conducive to your Mercurial placement. Nervines are agents that have a calming or soothing effect on the nerves. Again, these herbs and spices are available at your health food store. Prepare as a cup of tea or include it in your cooking as part of your weekly routines. One cup of tea twice a day over a week or month can be considered as a course of treatment when under excessive stress.

**VENUS SIGN:** This is not only your love sign, but also may indicate your areas of self-indulgence. Herbal and dietary astringents and tonics will be listed that are compatible and may offset the "battle of the bulge" which is now affecting a good part of the population. Begin by including these items regularly in your diet.

**MARS SIGN:** Our Mars sign is, at worst, an area of regular and upsetting inflammations. Again, fruits, vegetables and herbs that offset these inflammatory factors will be listed. These are known as ANTIPHLOGISTICS: agents which reduce inflammation. In the Orient they are called "cooling foods." Also listed will be the ruling VULNERARIES: healing applications compatible with your Mars sign (for when you have those little accidents) that will help wounds, cuts, and scrapes heal faster.

**JUPITER SIGN:** Jupiter rules the liver as well as fatty accumulations. Listed with your Jupiter sign will be a recommended LIVER CLEANSING protocol suited to your constitution. You can engage in this activity periodically, or as part of a detox program.

**SATURN SIGN:** The area of your body where you are most likely to accumulate toxins. Listed will be compatible STIMULANTS & PURGATIVES which should become part of your routine weekly diet.

**URANUS SIGN:** The area of your body most likely to be under spasmodic congestion. Listed in your program will be herbs and spices that act as ANTISPASMODICS to offset this tendency.

**NEPTUNE SIGN:** The area of your body most likely to become under vitalized or even atonic or atrophied, especially as your age progresses into retirement. Listed will be recommended herbs and spices which will help offset these tendencies, compatible and sympathetic to the Neptune placement.

**PLANETARY ASPECTS:** The afflictions or hard aspects indicate blockages or stress points which translate into increased needs for vitamins and minerals.

Born on May 21, 1945 at 5:46 pm MWT Placds TRP

### ELEMENTS & HIPPOCRATIC TEMPERAMENTS

The four fundamental temperaments are largely determined by the predominance of planets at birth in the air, fire, earth or water zodiac signs. Of chief importance are the Sun sign, Moon sign and Ascendant (rising sign). Next in importance are the zodiac locations of Mercury, Venus, Mars, Jupiter and Saturn. Thus, the temperament is determined by the grouping of planets in the horoscope. For example, if the predominance of planets and your rising sign are in air signs at birth, your tendency is to be a Spring type. Follow this simple exercise below and determine whether you are a Spring, Summer, Autumn, or Winter type.

Air-Spring signs are Gemini, Libra, and Aquarius. Fire-Summer signs are Aries, Leo, Sagittarius. Earth-Autumn signs are Taurus, Virgo, and Capricorn. Water-Winter signs are Cancer, Scorpio, and Pisces.

These types are also used in the fashion industry to type skin tones and choosing which colors are most suited for the native. These colors tend to bring out one's aesthetic features while harmonizing the personality.

Fill in the blanks below with your horoscope placements to see if you are predominately air, fire, earth or water. (Example: Rising Sign Scorpio = Water) This way you can determine which of the elements is predominant in your horoscope or if they are evenly distributed.

1. Rising sign: \_\_\_\_\_

2. Sun sign: \_\_\_\_\_

3. Moon sign: \_\_\_\_\_

4. Venus sign: \_\_\_\_\_

5. Mercury sign: \_\_\_\_\_

6. Jupiter sign: \_\_\_\_\_

7. Saturn sign: \_\_\_\_\_

Predominant Element(s): \_\_\_\_\_

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

**AIR**

**GEMINI, LIBRA, AND AQUARIUS**

*SPRING*

Skin: Creamy, peachy, gold undertones, delicate skin, finely textured, oily.

Tissues: Elastic, delicate, soft and loose, warm, fine hair; fat is soft, elastic.

Hair: Golden shades; strawberry blonde or redhead; golden brown; dove gray; creamy white.

Eyes: Blue; green with golden flecks; aqua, teal; golden brown.

Body: Long, narrow thorax; long, delicate limbs; of thin stature.

Best Colors: Blues, ivory, lemon, scarlet, turquoise, aqua.

Worst Colors: Burgundy, yellow, violet, browns.

**FIRE**

**ARIES, LEO, SAGITTARIUS**

*SUMMER*

Skin: Expressive, red undertones, robust. Tans evenly.

Tissues: Dense, firm, sinewy, muscular; fat is firm.

Hair: Usually blonde as a child, becoming mousy or ashy with a grayish cast with age; brown with auburn cast; blue-gray; pearl white; charcoal brown; salt and pepper; pearl gray; platinum blond; dark blond or ashen blond.

Eyes: Soft gray-blue; soft gray-green; brown-eyed; hazel (green brown); blue with whitish flecks.

Body: Athletic, muscular limbs; thorax long and wide; narrow waist.

Best Colors: Blues, turquoise, lavenders, plums, mauves, pinks.

Worst Colors: Black, bright orange, red.

Body & Soul for Roger Corrigan Ogden, UT

**EARTH**

**TAURUS, VIRGO, AND CAPRICORN**

*AUTUMN*

Skin: Ivory, ivory or peach with freckles, golden brown, yellow undertones. Burns easily.

Tissues: Dry, coarse, firm, body; fat is firm.

Hair: Rough, shaggy hair, dark colors, coppery red-brown; auburn; red or gold highlights; dirty blonde; charcoal brown or black; golden blonde; golden gray; oyster white.

Eyes: Dark brown; golden brown; green with yellow/brown flecks; pale green; teal or steel blue; olive green; amber.

Body: Broad, angular shoulders; tough, bony; oldish.

Best Colors: Magenta, teal blue, olive, jade, greens, red, purple, violet.

Worst Colors: Gold, black.

**WATER**

**CANCER, SCORPIO, AND PISCES**

*WINTER*

Skin Tone: Beige brown or olive with blue undertones. If white, milky with a translucent quality when healthy, pasty when unhealthy.

Tissues: Spongy, soft, lax, loose-textured fat, flabby.

Hair: Blue-black; dark brown or ash brown; salt and pepper; silver-gray; white.

Eyes: Dark red-brown; black brown; hazel brown; blue with white flecks; dark blue or violet; gray green; green with white flecks.

Body: Thorax short and wide; large-bellied; short limbs; stout.

Best Colors: True reds, magenta, green, purple, violet.

Worst Colors: Orange, yellow, browns, lemon.

NOTES: Your typology may have no bearing on your health. It only shows your temperament and your tendency to be either vital or somewhat weak. It generally shows what colors, gems, and environments vitalize you best.

Medically speaking, when the Sun sign is in fire or air signs, we consider a predominance of genetic traits to be linked to the father. When the Sun is in water or earth signs, we consider the heredity to be linked mostly to the mother. If both the Sun and Moon are in the same elemental zodiac sign, then we pay special attention to the rulers of the fourth and tenth houses, as the ruler of the fourth house is linked to the mother, and the ruler of the tenth house is linked to the father.

### **BODY & SOUL GLOSSARY**

Antiphlogistics - an agent that relieves inflammation

Bach Flower Essences- For emotional stability; originated by homeopath and physician Dr. Edward Bach of England

Decanate - zodiacal arc in ancient astrology; every sign is divided into 3 decanates of 10°

Hara - one's personal power

Karmic - the whole ethical consequence of one's acts considered as fixing one's lot in the future existence

Nervines - agents that have a calming or soothing effect on the nerves

Normergic - reacting or pertaining to that which reacts in a normal manner

Pathological - study of the nature and cause of disease

Photobiotic - capable of living only in the light

Polycrest - some of the great homeopathic remedies numbering around 50

Rashi - homeopathic formulas of Dr. Bhattacharya that counteract Moon afflictions

Vulneraries - a remedy to heal wounds

## Planet Natures and Sign Placements

### SUN

The Sun is the source of your vital power, principally ruling the brain and heart in man and woman. Its sign location (zodiac Sun sign), aspects to other planets, and house position indicate the vitality of the body, especially in males. Thus, the Sun is the indicator of health in males, while the Moon governs health matters in females. However, the Sun and Moon are important in health matters in both sexes. The Sun sign and Moon sign at birth, along with their aspects and positions, are regarded as the "fountains of life on Earth". The Sun is one of the vital centers in a star map, along with the Moon, Ascendant (rising sign), and Midheaven (tenth house).

The power of the Sun and how it radiates within you can be thought of as light rays emanating from a light bulb, powering into your body. The Sun signs are divided into the Four Elements: FIRE (Aries, Leo, Sagittarius); AIR (Gemini, Libra, Aquarius); WATER (Cancer, Scorpio, Pisces); and EARTH (Taurus, Virgo, Capricorn). All males born with the Sun in fire signs have the best prospects for good vitality, as light radiates most freely in a body composed of the fire element. Light also radiates freely in air, and these natives are the next strongest, but air sign people tend to become weakened by worry and nervousness. They need rest to recuperate. The earth element for sunlight is linked with the densest matter and gives tenacity, wear and tear, rather than vitality. These individuals tend to recover slowly from their illnesses. The water element for transmission of sunlight gives the weakest constitution (except for Scorpio), as water is a more difficult medium to manifest light.

The Sun is the giver of life, but is quite impersonal in its influence, in that the average man or woman rarely contacts its higher qualities in a conscious or positive sense. Planetary aspects, even if hard (square or opposite), are better than no aspects at all, as in the latter, the native is hardly touched at all by its influence. This fact is the reason "Sun sign" prophecies found in the tabloids and daily paper make no sense to some individuals. When well placed, however, the Sun signifies will power, authority, and self-reliance. If afflicted by the Moon or Ascendant, it may make the health feeble and the vitality low.

The Sun rules the metabolic fires of your body's cells. Its placement represents how that energy is needed and distributed. This topic has been termed PHOTOBIOLOGICS by the author. All biologic life is ruled by

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

the Sun. Your body requires copious quantities of light from many sources to maintain your health, vitality, and beauty. Each Sun sign has recommended foods that tend to foster vitality, as well as dietary pointers, and warnings about certain foods that will disturb your body's distribution of the Sun's vital rays, indicated by your Sun's zodiac placement (the season of the year in which you were born).

In terms of the Zodiac, the twelve signs represent the Grand Man, and rule the different parts of the body, from head as in Aries, to toe as in Pisces. Thus, there is a zodiacal rulership over the body and its organs. In terms of Sun signs and rising signs, it represents where disease potential exists. The locations and transits represent how an organ or bowel will be afflicted since these are rotating, dynamic entities. The houses at birth signify why disorders will manifest.

Inharmonious aspects to the Sun are angles and locations of the other planets in their orbits in relationship to the Sun. They are called afflictions. For example, if the Sun is afflicted by a hard angle to the Moon, the health will be weak, the rays of the Sun will be on the cold side and the eyesight will suffer.

**ANATOMY AND PHYSIOLOGY:** Vitality, the absorption of prana through the spleen, the immune system, heart function, spine and back, eyesight, individual cellular metabolism, the blood and oxygenation, consciousness.

### **SUN in GEMINI ☉ in ♊**

In Gemini, it is the intellect that develops in order to comprehend the universe. This karmic stage is concerned with information, data, and computers in today's world. The key phrase for Gemini is "I think." They need to express ideas and share information with others. The mature Gemini becomes a serious scholar, writer, and researcher. The immature Gemini can be a gossipy talker, nervous and high strung. It is the sign of the hands and fingers, and these individuals receive pleasure by using them, either in their work or even while they talk. Gemini's anchor points are words. Their sense of safety is by talking and responding well to emergencies. Their memories are excellent. They react intellectually to everything they experience and yet can be quite moody, hence their dual natured personality. Geminis must work to acquire calmness of mind as well as body. They might begin by learning to eat slowly and avoid using their hands in conversation and argument. This discipline will enable them to maintain control even during angry moments.

Geminis are described as the "perennial teenagers," as they always look younger than they really are. Their alert eyes are always full of humor,

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

with a thin nose, upturned like a child's, and a light gait with a long neck. As a rule, they are adept with mechanical devices, working with jewelry, arts and crafts, or doing repair work. Gemini talents also include design, artwork and graphics, interior decoration, magic and illusion, and music.

Each sign of the zodiac has external, internal and structural rulership. Externally, Gemini rules the shoulders and upper arms. Internally, the breath, nerve fibers, thymus gland and lungs, trachea and bronchi. Structurally, the clavicle, scapula, and humerus. This double sign portends the native suffering from two diseases at the same time. The pathological action of this sign is nervousness, negativity, passivity, or even restlessness. Tuberculosis, asthma, and anemia are common to the nativity. Vulnerable parts of the body are the arms, hands, fingers, lungs, and nervous system, especially the sense of hearing. Respiratory problems and various nervous conditions are common Gemini complaints which are benefited with the orange rays.

Gemini colors are yellow and light blue, yet the color that benefits them is orange. Agates and aventurine are traditional Gemini birthstones. These individuals should remember only to wear these stones if they wish to bring that particular energy into their life. Gemini flowers include the lilac, azalea, lily-of-the-valley, lavender, myrtle and sweet pea.

**BENEFICIAL BACH FLOWER ESSENCES:** Clematis: Dreamers, indifference, absent-minded, inattention.

Vervain: Stress, tension, over-exhaustion, forceful, argumentative.

**HOMEOPATHIC POLYCREST REMEDY:** Bryonia--Used in the treatment of colds, flu and headaches.

**CELL SALT:** Kali chloricum

**HEALING NOTE:** A

**AROMAS:** Benzoin, bergamot, mint, caraway, dill, lavender, lemongrass, lily of the valley, peppermint, sweet pea.

**PHOTOBIOLOGICS:** A mental sign, such as Gemini, requires oxygenating foods like fresh fruits and vegetables. The native benefits with orange colored foods like oranges, pink grapefruit, peaches, apricots, etc. which help decongest the lungs and prevent mucus. These types should avoid milk which produces mucus. They need plenty of potassium-based foods like fruit and they should avoid salt. They also should not eat heavily before bedtime. These individuals should pay careful attention to their

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

breathing, which should be regular and deep. They need fresh air to avoid sore throats, as well as plenty of water to prevent accumulation of mucus. Carrot juice is their vegetable drink of choice. Lentils are their beans of choice. Recuperation comes through mental relaxation and change of scenery.

SUSCEPTIBLE AREAS: Legs, ankles

AFFLICTIONS: Anemia; nervous disorders, stiff shoulders, diseases and injuries of the arms and fingers, leg pains; chest disorders, abnormal or shallow breathing, lack of proper oxygenation; hay fever, tuberculosis, pleurisy; gives up easily.

### MOON

While your Sun sign indicates constitutional vigor and its elemental quality (fire, air, water, earth), your Moon sign shows the flow of this vital force and your health. The Moon predominates health matters in the female chart, as well as those caught under the influence of its emotional force. A disturbed flow of the vital force, ruled by the Moon, will cause fluctuations in vitality and ultimately disease. Your Moon sign and its aspects show your instinctive, reflex actions, and your habits (good or bad). Moon patterns are reactions and habits set up in childhood; they are fixed unless acted upon by the individual. Its location, aspects, and afflictions are one of the most important factors to consider in the health chart.

The Moon represents the personal habits, suffering, worry, and disease tendencies. The Moon sign is always very sensitive and represents the weakest part of the body. Operations should not be performed when the Moon is passing through the native's Moon sign. The Moon rules the body's fluids, lymphatics, and the natural power of each organ, including its expulsive or detoxifying powers. Acquired and destructive habits are generally under the influence of the Moon sign. It rules the period of life from one to seven years, when so many destructive habits and health patterns are acquired from the parents or guardians. It shows what type of habits you may develop and how they affect your health.

Moon diseases today predominate the health chart. The Moon has a special affinity for the eyes and eye disorders, defects and errors of accommodation, putrefaction of the bowels, auto-intoxication, and disorders of the breasts, womb, and stomach. Moon forces harden and crystallize the body with age. Moon dominated persons are inconstant, restless, changeable, and variable, and succumb easily to infectious illnesses, colds and flu. The Moon rules the stomach. Today we see swollen abdomens due to excessive eating. Full, round bellies with visual

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

defects reflect just how Moon bound and problematic the aspects of this orbital body is in the health astrological chart.

The Moon afflicts other planets and signs by its oppositions and squares. These challenging aspects show an inclination to little or no exercise. The less afflictions in the female nativity, the better a chance of a long and prosperous life. The Moon sign signifies diseases that are acquired after birth, particularly due to indiscretions, bad habits, and emotional proclivities. It rules the natural powers and immunity. Cancer, the malignant disease, is a Moon disease, and is prevalent in our mood-based society of foul language, nasty thoughts, toxic diet, and bad habits.

It should be noted whether the Moon is above the horizon at birth (waxing) or below the horizon at birth (waning). The health will be stronger with the Moon above the horizon, rather than below. Hard aspects (afflictions) are not as strong when the Moon is waxing or increasing in light.

**PATHOLOGICAL TENDENCIES:** The Moon rules diseases that are periodic, returning time and again, as in epilepsy, vertigo, menstrual problems, swellings, migraine headaches, and gout. Rheumatism is a Moon disease, caused by the retention of wastes in the joints and fascia. Cancer is a Moon disease, caused not only by retention of wastes but also morbid bacteria, fungi, and viruses. Moon diseases today are epidemic, as obesity, lymphatic stasis, tissue puffiness, autointoxication, fungal/zymotic disorders, and worm infestation affect nearly all industrial populations. Moon diseases are accentuated by working under artificial lights or at night, drinking water from underground pipes and/or obtained from recycled wastes, eating devitalized food stored in refrigerators and freezers, breathing stale, foul or polluted air; and eating slaughterhouse meats.

The foods and spices that benefit Moon afflictions are those ruled by the Sun and Mars. The Sun produces fruits and vegetables which when eaten raw and/or fresh, will vitalize the individual and ward off disease. The old adage, "fresh is best", aptly applies to the health rules.

**ANATOMY AND PHYSIOLOGY:** Lymphatic system, breasts, mucous membranes, menstruation/fertility/uterus in pregnancy, stomach and alimentary tract.

### **ARE YOU A SUN OR MOON DOMINATED PERSON?**

The night is ruled by the Moon, and the Sun rules the day. The ancient astrologers believed that those born during the day are more ruled by the

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

Sun, whereas those born at night are more ruled by the Moon. Moon activities tend to raise the action of morbid germs, while the electric action of the day tends to destroy them. Night activities are less vitalizing than daytime activities. Females and Moon people tend to suffer more at night when ill. Moon people are more restless, inconstant, and changeable. The Moon rules the personality and lower mind, while the Sun rules the intellect and higher mind. Health tends to return when one begins to "see the light."

### MOON in LIBRA ♎ in ♎

The Moon in Libra is a fortunate position for the acquisition of friends and public popularity. It indicates a kind, sympathetic, optimistic person, and one fond of social pleasures. If well-aspected, this position indicates good reasoning powers and good judgment and love of art and music. When afflicted, trouble in partnerships, marriage, and public disfavor are possibilities.

Urinary complaints are not uncommon with individuals with Moon in Libra. This is a sensuous sign and these natives may be prone to over-indulgence. A ruddy complexion is common to this sign.

SUSCEPTIBLE AREAS: Breast, kidneys, heart, stomach.

AFFLICTIONS: Bowel disorders, illness from undigested meats, obesity with hypertension and high blood pressure, diabetes, kidney disorders, stones, and impure blood.

BENEFICIAL FOODS: Pineapple, plantains, sunflower seeds, watercress, capsicum, and leeks.

FOODS TO AVOID: Red meat, foods containing a lot of sugar.

RASHI HOMEOPATHIC MIXTURE: Secale cornutum, bryonia, cocculus, ambra grisea, phytolacca, carbo vegetabilis, helonias.

### MERCURY

Mercury, when well placed in the nativity chart, indicates a good and balanced mind. It rules the cerebral hemispheres. Ill-aspected and afflicted, it shows a tendency to various disorders of mental reasoning: bad judgment, nervous disease, a tendency to gamble or swindle, insomnia, and a lack of spiritual calm. The location in the chart shows what body parts may be prone to neuralgia.

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

Mercury rules Gemini and Virgo, therefore it manifests in diseases related to respiratory and digestive disorders, particularly of nervous origin. Physiologically, Mercury rules the respiration and breath. Mercury afflicted at birth indicates a tendency to shallow breathing. The Hindus believe rhythmic breathing is necessary for direct link between the soul and mind. Unrhythmic breathing severs this connection leading to nervous conditions, being easily influenced by others, proneness to depression, and even insanity. Unregulated breathing beginning in early life leads to a cascade of pathological actions including lack of intellectual development, oxygen deficient blood, a tendency to overeat since the diaphragm does not "massage" the stomach due to stifled breathing, lymphatic stasis since breathing opens the lymph channels, and lethargy due to lack of vital force and sluggish pranic currents. Mercury placement indicates much more than the mundane astrology books indicate.

Mercury is considered a neutral planet, in that its transmissions are governed by the aspects to other planets in the chart. When Mercury conjuncts the Sun, the ego is involved; aspected to the Moon, the subconscious and habits; to Jupiter, exaggeration, etc. When Mercury's nervous messages are distorted by the rays of another planet, inaccurate reception of information and inappropriate neural commands are likely. Simply, response does not match stimulus resulting in unbalanced behavior. If the large planets are involved, this can translate into important health consequences.

**PATHOLOGICAL TENDENCIES:** Mercury's chief influence is on the nerves. In regards to aches and pains, the placement of Mercury in the sign of body rulership shows tendency to affliction when ill-aspected. Thus, Mercury in Aries shows the tendency to headaches, in Taurus a tendency to laryngitis and sore throats, in Gemini chest pains, etc. To offset Mercury afflictions and thus reduce tendency to aches and pains, the native must learn proper and rhythmic breathing. Taking up study of yoga or Chinese Ch'i Kung would be of great benefit.

**ANATOMY AND PHYSIOLOGY:** Nervous system, nervous faculties; breathing, the hands, the touch; organs of speech and hearing.

### **MERCURY in TAURUS ♃ in ♉**

The native is very practical and determined, pleasant, fond of the opposite sex, music, art and all intellectual and refined amusements. Individuals with Mercury in Taurus don't usually jump to conclusions or easily accept new ideas. The mind is slow to reason, but once a conclusion is reached, he/she does not easily change. Their most productive approach to learning is through practical application. They are fond of fun

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

and recreation and are thoroughly likable people. If Mercury is well-aspected it makes the native persevering, discreet and diplomatic. If adversely aspected, the obstinacy and stubbornness of the bull are marked characteristics. There is also a strong desire for money, possessions, and a fixed income. This position can indicate hoarseness and laryngitis from nervousness and talking for too long. The native should drink adequate amounts of water to offset hoarseness and proneness to asthma and bronchitis.

**SUSCEPTIBLE AREAS:** Thighs, feet.

**PATHOLOGICAL TENDENCIES:** Stuttering, hoarseness, vocal disorders; deafness; asthma and bronchitis; foot pains; arrhythmia; muscle tics and tremors; color blindness; nervous affections and pains of the genitourinary system.

**NERVINES:** Apple juice, buckwheat, oats, wheat grass juice.

## **VENUS**

From the days of Hippocrates, father of Western medicine (Fifth century B.C.), the ancients emphasized the value of diet and exercise as the prime methods of restoration of health and longevity. Ancient figurines of women, known as the "Venus statues," depict a bottom-heavy, obese figure of a woman. Some of these Paleolithic figurines are believed to be more than 20,000 years old. They are found in all areas of Europe, as far away as Russia, and they all show women with huge hips and buttocks. Today, this is known as the "Venus Syndrome," the connection between Venus and lower body fat, today referred to as "cellulite"--the thickening and laxity of connective tissue beneath the skin, around gelatinous pockets of fat, which traps toxic matter and body wastes.

Venus is the principle of harmony, equilibrium, homeostasis, and thus rules the body's hormonal secretions. The Moon and Venus rule strongly over the affairs and health of women. Venus rules over all regulatory and secretory functions, especially the female sexual hormones. It rules the chemical composition of the body's fluids, acidity and alkalinity, sodium-potassium balance, and the other mineral ions. The planet is basically benefic in action, but in hard aspect frequently points to numerous little disorders, showing a general relaxation of the system and body tone, that may eventually debilitate the native as the years pass. Its afflictions are generally maladies due to indiscretions in diet and habit.

**PATHOLOGICAL TENDENCIES:** Venus has traditionally been associated with diabetes. Hard aspects to Venus point to lack of homeostasis, lack

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

of tone, congestion and swelling of the body's tissues; cyst formation; and kidney disorders. Venus also rules over the veins and indicates such disorders as varicose veins, hemorrhoids, vascular spiders, etc.

**ANATOMY AND PHYSIOLOGY:** Homeostasis, hormonal balance, ovaries, kidneys, venous system, tissue tone, nutritional functions, skin and complexion.

### **VENUS in ARIES ♀ in ♈**

This position inclines the native to be affectionate, imaginative, with an idealistic temperament, yet changeable in feelings and romantic in love. There is popularity with the opposite sex while individuals with natal Venus in Aries rush to enthusiastically embrace relationships of all kinds. They enjoy having fun and their passionate eagerness can be inspiring and contagious. The combative nature of Aries also means they may be too aggressive in forcing their attentions or affections on others. Their social instincts are friendly and they tend to be popular. Afflictions to this planet indicate general extravagance of one's expenditures. This position can indicate mucus congestion in the head and nasal passages; eczema of the head and face; gastric headache from overeating rich and starchy foods.

**PATHOLOGICAL TENDENCIES:** Skin troubles, eczema, yellowness of the complexion, facial eruptions; uterine complaints, disordered womb; nasal catarrh; congestion of the kidneys due to poor dietary habits.

**ASTRINGENTS/TONICS:** Green tea, radish.

**SUSCEPTIBLE AREAS:** Kidneys, feet.

### **MARS**

Mars is known as the "lesser unfortunate," and Saturn is known as the "greater unfortunate," as both are considered malefic planets. The action of Mars is acute, violent, heating, inflammatory, and febrile. Mars rules one's physical energy, expressed as either self-assertiveness and healthy efforts, or aggression and hostility. Mars actions include arousal, erection, and penetration. Mars diseases are traumatic, contagious, burning and blistering, leaving scars, pock marks, and disfigurements. They are diseases that arise from anger, frustration, madness, or wickedness. When Mars is well aspected, it shows a strong constitution, good physical endurance and independence. Natives under strong benefic influence are practical, handle instruments well, and make good surgeons and dentists. When unfavorably aspected, the native is prone to fits of fury,

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

may be argumentative, and is liable to be involved in accidents.

Esoterically speaking, Mars, like the Moon, is one of the planets that loses its influence as spiritual faculties are developed. It is a planetary influence where its principal expression--anger--always brings reciprocal negative reactions of the worst kind. To better understand its influence in the native, its house location indicates the external conditions in the life of the native that need spiritual development. The zodiac sign location of Mars indicates the body's susceptible areas where the negative emotion of anger will raise havoc and disorder.

**PATHOLOGICAL TENDENCIES:** Inflammations and scars on the body parts ruled by the zodiac sign or house of its placement; alterations in blood chemistry, especially glucose, calcium, magnesium; geloses and myogeloses in muscular tissues; liver torpidity and congestion; genitourinary infections; hypertension and hypertensive headaches, migraine.

**ANATOMY AND PHYSIOLOGY:** Body heat, inflammatory response, adrenal function, formation of hemoglobin and blood clots, digestion of food, muscular activity, glycogen storage and liver function, genitals.

### **MARS in ARIES ♂ in ♈**

Mars in Aries indicates force, self-assurance, combativeness, originality, and mechanical ability. The native is impulsive, quick-witted, aggressive, and impatient when restrained. Self-interest is strong, and these individuals will be determined in their ventures with little outside encouragement. This position gives an abundance of vitality and a love of sports and muscular exercise. If Mars is afflicted, the temper may be hasty; the native should moderate the temper so as to avoid violent headaches. There is possible danger through fire, or through surgical operations about the head, which often leave a scar on the face.

**PATHOLOGICAL TENDENCIES:** Head disorders and headaches, dizziness, tendency to stroke and sunstroke, facial blemishes and neuralgia; hay fever; shingles; ear pains, otitis; inflammation of the eyes, conjunctivitis; fevers; wounds; burns.

**ANTIPHLOGISTICS/COOLANTS:** Cloves, cumin, artichoke, brown rice.

**VULNERARIES:** Aloe, comfrey, clove oil.

**KARMIC TENDENCIES:** Death by burns, fever and inflammations.

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

SUSCEPTIBLE AREAS: Abdomen, head.

### JUPITER

When favorably aspected, Jupiter shows one's tendency to benevolence and jovial disposition. These natives are courteous, refined, law abiding, and honorable. When adversely aspected, it denotes lawlessness, self-indulgence, carelessness in meeting obligations, and gluttony which results in ill-health.

Medically, Jupiter in the natal chart rules the liver, the main organ for balance and detoxification, reception of the intestinal portal circulation, and control of fat utilization. Thus, Jupiter rules fat metabolism. It rules the arterial blood, and the functions of digestive assimilation, especially in regards to the liver. Jupiter also rules the adrenals and the storage of glycogen, and thus has influence over the stamina and muscular power. The placement of Jupiter points to those herbs and dietetics that will best suit the native for detoxification and periodic cleansing of the bowels and thus the liver.

Although Jupiter by nature is benefic, it has a malefic influence when in hard aspect to the Sun, Moon or Ascendant, and in the sixth house. Most of its maladies are accentuated by indiscretions in diet leading to blood disorders, toxicity, and fatty accumulations.

PATHOLOGICAL TENDENCIES: Obesity, toxicity, hypertension, abdominal fullness, diseases from "high living," stroke, hemorrhagic diseases, jaundice.

### JUPITER in VIRGO ♄ in ♍

Jupiter in Virgo indicates a cautious, analytical and practical nature with a faculty for discrimination. A well-aspected Jupiter indicates success with employees who will be faithful and loyal. It also indicates prosperity through professional vocations. If Jupiter is afflicted it can indicate a cynical or critical disposition, or one who is mistrustful of others and therefore liable to losses through employees. Such people may find it extremely difficult to obtain or keep a position until spiritual lessons are fulfilled. These natives are prone to disorders of digestion, the liver and bowels.

SUSCEPTIBLE AREAS: Kidneys, knees.

PATHOLOGICAL TENDENCIES: Intestinal problems with weak digestion and diarrhea from dietary indiscretions, parasite infection; congested lungs; liver toxicity and congestion from high living; abscess of the liver or

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

bowels; impure blood, jaundice.

LIVER CLEANSING: Milk thistle (*silybum marianum*) tea or tincture on an empty stomach; banana smoothies; beet juice.

## SATURN

In Greek, Saturn is known as "kronos," from which our word "chronic" is taken. Permanent disease is signified by the placement of Saturn in the chart, and its course and attack by the motion of other planets. Its action signifies binding, crystallizing, cold, dry, hardening, depleting, obstructing, retarding, and suppressing. The afflictions of Saturn are for prolonged periods, whereas Mars afflicts more acutely, for short periods.

Saturn's placement in the chart is associated with the solid matter of one's body, ruling all dense components and processes. Saturn in any part of the horoscope is considered an affliction to the zodiac sign, house, and parts of the body so ruled. It tends to weaken and make one more liable to disease, and the sign and parts ruled are usually considered the most vulnerable, even to cause death through disease and malignancy. Those parts ruled at birth by Saturn indicate reduced nerve and energy supply, insufficient oxygenation, accumulation of tissue acids, and thus fibrositis, myositis, and rheumatism. The planet Saturn indicates subnormal conditions by inhibition, retention, and suppression. The medical astrologers at the turn of the century stated that carcinoma is most liable to occur in that part ruled by the sign that Saturn is in at birth. Saturn also has rulership over the blood's clotting factors, the parathyroids, and calcium metabolism.

Saturn's afflictions come from lack of self control or spiritual development, and materialistic tendencies. When manifested negatively, Saturn's principle action is quite simply fear. The hard aspects indicate an opportunity to come to terms with a specific kind of fear. The type of fear is indicated by Saturn's aspects (conjunct, square or opposition) to the Sun, Moon, Mars, Mercury or Venus.

PATHOLOGICAL TENDENCIES: Typical Saturnine problems are chronic skin complaints, stiffness of the joints and muscles, deformity, dental problems, deafness, depression, slowed atrophy and functioning of the body's processes, scleroses of the body's tissues, rheumatism from accumulated tissue wastes in the sign or house of the nativity chart.

Subluxations of the spine are partial dislocations of the vertebra which impinge and put pressure on the nerves passing through them, shutting off nerve supply and causing irritation and pain leading to disease. Along

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

the lines of chiropractic philosophy, health is maintained by a correctly aligned spine that requires periodic adjustments by manipulative therapy. Palpation and X-ray discover these deviations but your astrological chart can identify weak areas that will be chronically affected. Each sign of the zodiac, and malefics placed in them, tend to afflict the vertebra, especially the vertebra ruled by the sign in which Saturn is found at birth. Such subluxations tend to be the major ones throughout life. For example, the sign Libra rules the kidneys and if Saturn is here at birth, the 10th, 11th, 12th dorsals, and 1st lumbar will be afflicted the most, and this is known before examination. From a chiropractic or osteopathic standpoint, the emphasis of treatment should be in the area where Saturn was afflicting at birth as this area will show stasis, restrictions, stiffness, and congestion.

ANATOMY AND PHYSIOLOGY: Skin, bone and joints, teeth, hearing, ossification.

#### **SATURN in CANCER ♄ in ♋**

Natives with Saturn in Cancer may find it hard to express themselves, yet they have reliable judgment and if Saturn is favorably aspected, they gain through investment. This Saturn placement favors economy and home comfort, and indicates a religious tendency. When afflicted it can cause feelings of dissatisfaction, resulting in many changes of residence and pursuits. There may be some anxiety and sorrow connected with the parents and attachments formed in childhood. Relationships with young children and women may be somewhat inhibited.

This position indicates a weak stomach, which can cause chronic indigestion and malnutrition, but which can be relieved by moderating starches, condiments and eliminating animal products from the diet. The native should pay close attention to the nutrients vitamin B-12 and iron as they are prone to weak blood if not anemia. Digestive aids and enzymes can alleviate poor digestion and gastric complaints, bloating, and poor assimilation.

SUSCEPTIBLE AREAS: Kidneys, abdomen, sex organs.

PATHOLOGICAL TENDENCIES: Gastric and digestive complaints, abnormal appetite, craving for sweets, flatulence, bad breath; full and swollen breasts; congested lungs, labored breathing, asthma; uterine complaints, genital disorders; gall stones; skin disease; sea sickness; prone to scleroses of the body's tissue; deficiency of stomach acid (HCl) leading to improper digestion of proteins and intestinal putrefaction; gall stones; parasite infection.

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

COUNTERACTING STIMULANTS: Chicory, lemon. (Lemon juice with water is an excellent detoxifier for this placement).

RULING VERTEBRA: 4th, 6th, 7th, 8th dorsals.

KARMIC TENDENCIES: Death by drowning (afflicting the Moon) or at sea (afflicting the Sun or Ascendant).

## URANUS

Uranus rules your electrical life breath, and thus your avenues for personal as well as societal freedom. It indicates potential for originality of thought and expression, yet its energy is not accessible to much of humanity at this time. In society it rules radical ideas and people that are years ahead of their time. They lead to revolutionary events that upset established structures. The Aquarian age is ruled by Uranus. We first felt the affects of its impending cycle when we discovered electricity, which it rules, and which is now interconnecting everyone on the planet with a synthetic telepathy.

Karmically, all aspects to the personal planets--Mercury, Venus, Moon, Mars, Jupiter and Saturn, or the Ascendant--indicate areas of life where there is a strong urge for freedom of expression without restraint and the need for constant stimulation and excitement. This planet also represents the capacity to be high-strung, excitable, and temperamental. The motives of Uranus thus represent the purpose of radically repolarizing an individual's past lives, and open one up to new experience either through stimulating, shocking, and even traumatic crises to find new ways of living. People who are ruled by Uranus are lovers of freedom, rebellious at the least restraint, intuitive and inventive. They are aviators, high level mechanics, or deal directly with electricity. Uranus also tends towards erratic behavior and can make people irritable and brusque in manner.

ANATOMY AND PHYSIOLOGY: Skin, bone and joints, teeth, hearing, ossification. Uranus rules all the rhythmic processes of the body. It rules the movement of the whole digestive tract from mouth to anus. Thus, the common symptom of its afflictions are spasmodic manifestations and disrupted rhythms--muscles spasms, shock, cramps, strictures, ruptures, paroxysms and contortions.

## URANUS in GEMINI ♊ in II

Uranus in Gemini indicates the native is versatile with mental powers indicating originality, intuition and ingenuity. If Uranus is favorably aspected, success may come from electronics, aviation, science, metaphysics, and

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

astrology. The native is alert, progressive, readily grasps new ideas, and is broad minded. When Uranus is afflicted, the mind may be eccentric, and change from one issue to another without any definite logic. Adverse aspects can also indicate possible conflicts with brothers, sisters and neighbors, or liability to accident while on short journeys.

**PATHOLOGICAL TENDENCIES:** Active mind; spasmodic chest pains, abnormal breathing with nervousness, bronchitis, emphysema, hacking cough, asthma; heart affections; cramps and muscular spasms in the arms and shoulders; weakened digestion; colds with hard, dry cough.

**ANTISPASMODICS:** Dill, fennel, marjoram.

**KARMIC TENDENCIES:** Sudden illness or accident of the shoulders, arms, hands, or lungs.

## NEPTUNE

Neptune takes approximately 164 years to orbit the zodiac, taking about 13 years in each sign. Its position is a kind of cultural expression manifesting itself with imaginative and creative faculties of a generation. Its location points to a common spiritual destiny shown by the sign that it occupies. As one gets older, new generations may then seem strange in style, cultural or artistic expression, something not innately understood by the native.

People with an afflicted Neptune should always be on guard for deception, trickery, and fraud. Since each one's life is the outcome of former living, afflictions of Neptune offer ready channels where enemies from past lives can gain entry into our sacred temple. Forewarned is forearmed and confrontations can be stepping stones upward in life, or misery leading to drug abuse and apathy. Afflictions to Neptune may also indicate a previous life of extreme asceticism where the physical body was ignored or neglected leading to a leaky aura in this life. The corroborating symptoms are tiredness and need for a lot of sleep. There is also susceptibility to tuberculosis as Neptune is the ruler of this disease. Sunlight counteracts the tubercular diathesis and helps to harden and strengthen an etheric body with a leaky aura. Likewise, a favorably aspected Neptune may let one drone away one's time, neglecting valuable opportunities offered for soul growth by following the deceptive lines of least resistance. Neptune rules illusion and abstract thinking, as well as those areas of life where conditions are not always what they seem.

**PATHOLOGICAL TENDENCIES:** Neptune's placement in the natal chart

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

points to conditions which are difficult to diagnose, or are wrongly diagnosed. It has rulership over the aura and etheric body. Its afflictions denote laxity and weakness of the vital force, and subnormal conditions, as lack of development, undersized body or organs. Its placement in the chart and hard aspects have a strong rule over wasting of tissues leading to decay and disintegration. Its pathological manifestations are lethargy, drug abuse, intoxication, and general lack of tone throughout the body.

ANATOMY AND PHYSIOLOGY: Pineal gland, appendix, right-brain function.

### NEPTUNE in LIBRA ♃ in ♎

Neptune in Libra, when well aspected, gives a musical, poetic or artistic temperament. It indicates a native of a highly spiritual nature which gives the native great comfort and satisfaction. When Neptune is afflicted in Libra, there is a tendency to be part of clandestine, unconventional and illegitimate relations, either of the native or of the partner, according to the nature of the planetary aspects to Neptune.

PATHOLOGICAL TENDENCIES: Edema.

HERBAL STIMULANTS: Cinnamon, curry.

### PLUTO

Just as your Sun sign represents your true identity in this life, Pluto's house represents an old pattern of identity from the past. It is a past pattern of life that is carried over into this life. We can say that Pluto's house is that area of life where complete regeneration is needed. Compulsive behavior and even ruthlessness needs to be transformed into willful intentions yielding great powers of perception and insight into the subtle forces of life. Plutonian people can make great healers simply by touch or vision.

The aspects of Pluto to other planets give an indication as to how that transformation can bring new understanding and regeneration. Whether the aspect is "hard" as in square or opposition, or "easy" as in a trine or sextile, determines whether one has an innate knowing, or will meet some hard karmic destiny. There is an enormous potential for power by discovering those fields of experience in the house of Pluto. It heals when it is tapped.

PATHOLOGICAL TENDENCIES: Medically, Pluto's energy is concerned with eliminative processes, both physical and spiritual. The energy

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

represented by Pluto is life-giving and cleansing. Pluto's transits are said to destroy the old forms in order to bring in the new. Its pathological manifestations are abscesses, malignancies, ulcers, and poisonous bites.

ANATOMY AND PHYSIOLOGY: Reproduction, defecation, expulsion of waste matter.

### **PLUTO in LEO ♁ in ♏**

Pluto in any sign always represents fundamental change, upheavals, and drastic transformations. Pluto's period in Leo was from 1937-1956. Leo rules kings and representatives in government. These children grew up in rebellion either born during the war years or shortly thereafter. The idea of self-sufficiency bloomed later in these children, returning to the earth, living in communes and counterculture societies with a basic distrust of the establishment. Pluto in Leo also marked the period of atomic energy, which is ruled by Pluto. For the first time in recent history, man witnessed the atomic bomb. A worldwide power struggle followed in the form of a cold war. This position generally indicates magnetic power, blossoming romance and pleasures; the native has an incentive that leads to fame and popularity; an attractive personality; can be an effective leader; is an inspiration for valued friends; finds rewards in the entertainment profession, social worth in all contacts.

PATHOLOGICAL TENDENCIES: Sarcoma, cancer.

**House Placements and Aspects**

**HOUSE 1**

The first house and the sign that rules this house, is also known as the Ascendant or rising sign, or that zodiac point which is actually crossing against the horizon at the exact time of your birth. It denotes your outer personality and physical constitution. The Ascendant is about interaction with you and the environment, the meeting point between the individual and the external world. Its sign denotes the type and amount of bodily energy (chi). The planet ruling the sign of the Ascendant is considered one of the principal ruling planets of the horoscope. First house placement is so important, that the degree of the sign rising is treated as though it were a planet with regards to aspects with other planets and with regards to pinpointing details of the health chart of the native--his/her mind, body, strength, pathological tendencies, etc. The sign on the Ascendant denotes the body’s conductance or resistance to the inflow of prana or vital energy. It is conducted best by fire and air signs; and resistant if the rising sign is of water or earth elements.

In every sense the first house should be called the native’s personality as it shows what is on the surface, how you appear to others, how the world sees you. Outsiders are attracted to you by this sign. It accounts for those glaring contradictions we find in human behavior. You may feel yourself as sexy, yet it is not picked up by others or appears that way due to your rising sign’s influence, and vice versa. It explains why some people are forever getting in trouble or attracting trouble through no intentions of their own. When the first house contains no planets, it means individuality is not a matter of personal concern, these individuals accept themselves "as is." If the first house contains one or more planets, then the native is consciously concerned about some aspect of his identity. There is some dynamic or hang-up that needs resolution, karmically speaking.

Planets in the first house indicate the native is aggressive and strives to be "first" denoted by the planet or planets posited. These individuals usually have a difficult time resting and relaxing their bodies which they need to learn in order to insure good health. First house people tend to be individualists with a forceful drive and ambition in life.

The first house shows the organic elements, the physiological factors, and the physical characteristics which determine the strength and resistance of the body. The Ascendant and the first house represent the

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

"original impulse of individual being," or the self as a particular vibration and rhythm, and the unique soul destiny of the individual. It indicates essentially the type of experience through which he/she will best discover who they are. The zodiacal sign on the Ascendant normally tells us the "dharma" of the individual, the central potentiality which the conscious person is seeking to actualize. If there are planets in the first house, they indicate the kinds of functions which will be most valuable in the process of discovery of one's authentic being. Thus, the planets and the first house ruling planet show the way to impel performance of specific acts.

One can often discover what zodiacal sign was rising at birth (if time of birth is not known) by studying a person's facial features and expression. The head symbolizes the essential character of the individual. The head is ruled by the first house. The first house rules the body form, constitution and temperament. The physical appearance, strength and vitality, weight, height, color of hair and eyes, etc. are largely determined by the rising sign and degree rising on the cusp. The position of the first house ruler and planets rising modify these features. The zodiacal sign ascending denotes the part of the body more liable to affliction from external causes such as trauma and infection.

The benefics, Jupiter and Venus, in the first house at birth indicate a good constitution, whereas the malefics, Saturn and Mars, denote scars, birthmarks, moles and abnormalities of the head. This house at birth, and by direction, signifies all diseases of the head, face, eyes, ears, nose, and mouth. This house is closely associated with the feelings, sensations, emotions, manners, passions, and dispositions of the native. In this regard, it explains why the Sun sign does not reflect all the features of the native, and why the Ascendant and the Moon sign are of equal importance in the analysis of the health horoscope.

Regarding the compatibility of healer and patient, the rising sign in each natal map should be in harmony, belonging to the same triplicity, that is in trine or sextile to each other. If the patient has Aries on the Ascendant at birth, his/her healer should also have a fire sign on the Ascendant, as in Leo or Sagittarius. If the healer employed has Cancer, Libra, or Capricorn on the Ascendant it would tend to be adverse, if not in results, certainly in relationship and cooperation. The sextile and trines naturally tend to inspire confidence and faith between healer and patient.

**AFFLICTIONS:** Head and face, endocrine disturbances which affect the mental states, brain tumors, high fevers, meningitis, migraines.

**HEALING COLOR:** Indigo

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

EMPOWERMENT COLORS: White, pink, red, champagne

### LIBRA ASCENDANT ♎ on 1

Those with a Libra Ascendant are usually attractive and charming. These individuals possess much vitality and make quick friends. They are concerned with their appearance and carry themselves well. Individuals with a Libra Ascendant have skin that has an earthy, translucent quality. Even the Librans who are rather bland, are good-looking and charming. Skin disease due to diet and lack of hygiene are the weak points. When the Ascendant is afflicted, the native may be introverted and shy. They may either be vain and care too much about how they look, or they may not care anything at all about their appearance. This position tends toward a lack of muscular tone, sluggish elimination of toxins, and back pains. The body is usually well proportioned.

The rising sign is divided into thirds, or 3 "decanates", which have a powerful influence over the appearance and form of your body. The sign is simply divided into three 10° aspects as follows: 0-10° first decanate, 11-20° second decanate, and 21-30° third decanate. Each decanate is ruled over by a planet. The first ten degrees is ruled over by the indigenous sign ruler, the second takes on the qualities of the next elemental ruler, and the third the successive element sign ruler. Thus, the first decanate of Aries is ruled by its Mars, the second takes on the qualities of Leo, and the third would combine the qualities of Aries and Sagittarius, and so on throughout the zodiac. Simply locate the first house on your natal chart and note which degree is rising in the sign listed. This gives you your decanate.

**FIRST DECANATE APPEARANCE:** Librans are usually slender in youth, but tend to stoutness in middle life. Being a sign of charm, the features are regular and pleasing, especially in women. The brow is broad and high, the mouth sensitive and well shaped. The shoulders in men, however, are often too narrow and the hips can be too wide.

**KEYWORDS:** Lovable, musical, artistic, graceful, elegant.

**SECOND DECANATE APPEARANCE:** The Aquarius decanate denotes a short neck and high shoulders. The aquiline nose reveals initiative and combativeness. Men born under this sign have wide hips as a rule, as was the case of Napoleon and Hitler.

**KEYWORDS:** Humane, poetic, altruistic, genial.

**THIRD DECANATE APPEARANCE:** The Gemini decanate is ruled by

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

People with planets in the second house have overwhelming desires to prove their self-worth, establish themselves in society by big factors as indicated by the house rulers outlined above. For example, if the Moon is in the second house, fourth house matters like the home are important and the native will desire a big home or big family. After having established their nest eggs, (with the personal planets Venus, Moon, Mars, Jupiter placed in this house) gluttony is not uncommon. The native will also learn the karmic problem of this house--happiness is the one thing that cannot be bought.

**AFFLICTIONS:** Problems with homeostasis--blood and electrolyte changes; intake of nutrients--diabetes, obesity, hypoglycemia; disorders arising from vaccination.

**HEALING COLOR:** Yellow

**EMPOWERMENT COLORS:** Green, lemon, citrine, brown

### **SCORPIO on 2nd HOUSE ♏ on 2**

The second house shows how the native earns money from his/her own efforts and resources. Scorpio ruling the second house indicates a good sign for obtaining money, often being earned from restoring life to objects or situations left for dead by others. This would involve restoring real estate, antiques, and even refurbishing "junk". The native may be so concerned with making money that nothing else matters. These individuals need to focus on the more important things in life and learn that money is not everything. This position indicates that the native may leave an inheritance rather than receive one.

### **HOUSE 3**

Astrology speaks of the third house as that of brothers and sisters, and close relatives. It actually means the earliest newborn environment and of one's grown relationship to it. The relationship of the child to his/her environment is basic and substantial in the formation of his/her character, and of responses to life. The third house refers to the early environment and to persons who acted within it--close relatives, guardians, siblings, etc. It also shows in the child "coming to terms" which is at first entirely unconscious and instinctual, later becoming the foundation for human intelligence, and consciousness.

No planets in the third house means response in a natural fashion. One or more planets in the third house indicates a self-conscious need to express thoughts. It may sometimes indicate speech difficulties. The na-

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

tive is often asked to help other people, brothers and sisters. The disease of "other people" can lead to great frustrations and nervous stress. These individuals need to learn to say no, take regular breaks in peace and quiet, take short naps after lunch, etc. for the health to improve.

Malefic planets in this house tend toward mental instability and chaos unless well aspected. It shows traumatic experiences such as child abuse, fights with siblings, rebellion, etc. What differentiates this house from its opposite, the ninth house, is that of experiences involving direct personal contact with the close environment of the individual, resulting in habits and proclivities. It indicates physical actions, and transportation, especially within your immediate environment. Benefics in this house, when well aspected, indicate a well balanced mind. It rules the fingers, hands, chest, lungs, the lower mind and wakefulness.

**AFFLICTIONS:** Disturbed breathing rhythms, reduced vitality, lack of oxygenation, nervous tension, mental instability.

**HEALING COLOR:** Orange

**EMPOWERMENT COLORS:** Yellow, indigo, white with red

### **SAGITTARIUS on 3rd HOUSE ♐ on 3**

The third house deals with the native's immediate speaking, writing, and communications audience in his/her work or professional environment. Sagittarius ruling the third house indicates those with talent for using communication for promotion more than for creativity. They like offering endless advice, telling stories, and sharing all kinds of gossip. These individuals may be restless and independent. They enjoy reading newspapers, monthly magazines and trivia.

### **HOUSE 4**

The fourth house is said to have two basic meanings--the soil or secure foundation in which man is rooted, and the "heart" or fundamental rhythm of the individual self. It is indeed the Nadir of the chart, the midnight point of consciousness, where "God-experience" can be had. The vertical line of the birth chart--Zenith to Nadir--points upwards to the sky (Zenith) and downward through the spinal column at the center of the globe. Unity comes by centering one's "Hara" or vital energy with that of the Earth.

Its sign and planets refer to the kind of feeling which spontaneously mobilizes and directs the energies of the organism, often called "gut feeling."

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

The Ascendant tells who we are, while the Nadir shows what we are, at least potentially, where we stand. It is the power implied in "being a person," yet in today's global economy it is basically conditioned, if not entirely determined, by socio-cultural patterns and media manipulation, rather than by ancestral family values. Thus it indicates the beginning as well as the end of various cycles in the native's life, including old age, the end of life and death, the various conditions which affect the close of life, its diseases, worries, wealth or poverty, etc. The nature of the end of life will be told by the planets in this house, and the sign on which the cusp begins reflects the part or organ where the complaint will lie.

If there are no planets in the fourth house, the native accepts his background and family and makes the best of it. If there are one or more planets in the fourth house, then conscious attention is directed towards his background. He/she has reasons to question, if not doubt family matters. Some may have unfortunate liabilities to overcome before they make headway in life. Malefics in this house can indicate early childhood traumas which are best recalled and cleared by past life regression. Neurosis can result from repressed anger. Parental attitudes and conditioning have led to unhealthy, if not neurotic, habits. All these matters of childhood trauma and abuse are judged by the fourth house.

At the biological level, the fourth house symbolizes the acquirement of nutrients to satisfy basic physiologic needs to meet daily routines and obstacles. It is the energy needed for intercellular exchanges and for adjusting the body to changes in temperature and the demands of the physical environment. It rules over the body's water, interstitial fluid, and lymphatic environment. In a mentally and emotionally developed person, one's personal power (Hara) is available for self-expression and social contact. In an undeveloped or immature being, confusion sets in with mixed impulses carried over from previous lives and those values family and society has forced upon the individual. This results in oral fixations, hormonal imbalances, lymphatic stasis and obesity. It is a being out of rhythm, breathless, confused and never satiated.

This house rules the breasts, lungs, stomach; inheritance; the birthplace and home place; the mother in the male chart and father in the female chart. Benefics in this house at birth indicate that the native should live in his native homeland, if possible, for insured good health and fortune, leading to a happy end of life. Malefics here may point to a short life of the mother or father, according to the sex of the horoscope; disease, distress, and worry in old age.

**AFFLICTIONS:** Oral fixations, overeating, nutritional disturbances, obesity, anorexia, diseases of the stomach, breasts, and lungs.

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

HEALING COLOR: Violet

EMPOWERMENT COLORS: Silver, green, russet, brown

### **AQUARIUS on 4th HOUSE ♒ on 4**

The fourth house is the area of private concerns, emotional security and how we inwardly feel about ourselves. If there are no planets in this house, there are generally no problems in the way these individuals accept themselves. The cusp on this house shows the general tempo of the subjective self. Aquarius ruling the fourth house indicates that these natives view themselves as radical departures from the norm with license to pursue their own independence. They are apt to be gifted in some way. Their relationships with the family are apt to be eccentric and as a rule there is probably something out of the ordinary and unusual about their childhood or home environment. These individuals are apt to live in a different place or area than the one in which they were brought up. The close of life is apt to be unusual and the native may desire to be cremated.

### **HOUSE 5**

At its highest potential, the fifth house shows the exteriorized power and a projected vision originating from a realm that is "super personal." The person thus becomes an agent for some great collective consciousness or planetary, evolutionary purpose. He/she becomes a lens through which light is condensed and brought into focus, at which point power can operate and work can be performed. This creative process, work, and its products are conditioned by the nature and temperament of the person. The person acts strictly as an individual. To the extreme, he/she expects results that will bring fame, prestige, and ego-satisfaction.

The fifth house is the area of experiences which are essentially the outcome of emotions, as distinguished from gut feelings of the fourth house. Feelings are spontaneous reactions, whereas emotions seek an exteriorization, or "moving out" with synchronous organic changes and muscular movements. The fifth house is associated with gambling in any form, for money, business ventures, romance, etc. whenever one follows hunches, inner frustrations, or imagination.

Traditionally, the fifth house is considered to be the section of the birth chart (radix) referring to love affairs, versus a seventh house marriage. Fruitful signs and planets here denote many children, barren signs and planets here tend to deny children. This house rules the back, spine, liver, stomach, appetites, love affairs and sexual appetites. This house is

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

said by some to rule the soul.

Each house of the radix refers to power and unfoldment, as well as some great test of the developing individual. The zodiac sign on the cusp of this house and planets within should give the student of astrology clues as to the best way in which he or she can solve problems creatively. The Chinese character for danger also means opportunity, depending solely on one's perspective and ability to be creative. The test of the first house is that of isolation, or emergence as a unique and valuable human being. The test of the second house is that of ownership and possessions. In the third house it is thought and how to handle ideas to approach challenges of one's environment. The fourth house test is that of stability. The challenge of the fifth is creative self-expression.

No planets in this house means the native has little attraction to fifth house matters. He/she can take gambling or leave it. One or more planets in this house shows the native has a natural interest in art, pleasure, children, romance, or gambling. These natives may feel a great need for love. Their ailments can come from chaotic affairs leading to frustrated and fragmented lives. The root cause is insecurity. Naturally, the houses ruled by the planets in the fifth house contribute and inspire all fifth house creativity.

**AFFLICTIONS:** Heart disease (with malefics in this house), overeating, spinal disorders, liver problems, arteriosclerosis, hypertension.

**HEALING COLOR:** Purple

**EMPOWERMENT COLORS:** White, gold, green, red

### **PISCES on the 5th HOUSE ♋ on 5**

The fifth house is where the ego extends into so-called pleasurable pursuits. Pisces ruling the fifth house indicates those who indulge in secret romance or become the victim as such. They are very sentimental in affairs of the heart to the point of disillusionment. Relations with children are apt to be idealized or unreal.

### **HOUSE 6**

The sixth house implies a crisis of perception, the period of personal readjustment, the time in one's life when one is forced to realize what he/she has done and whether success has come to rest or to haunt. Once a work is completed, the composer is often painfully aware of how it could have been produced better. A person's inner worth is often revealed

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

when faced with experiences and periods of inadequacy, frustration, or defeat. These crises take their toll upon the body, require guts and fortitude, and great reserves of vitality. This house represents fundamentally, everything that deals with personal crises, the way to best meet them, and the direction of personal growth and transformation. The sixth house is somewhat karmic in nature by its perception or reason for duties, debts, and obligations.

The sixth house is known as the "house of health" and the sign on the cusp of this house indicates which body parts and organs are prone to disease and affliction. Illness may be the direct result of some defeat of the vital energies unable to cope with a challenge to grow stronger, or an attempt by the soul to show a need for a revision in attitude. The sixth house shows a response of the individual to a social situation. Also, as a patient, one should not consult with a doctor whose natal Saturn is in the sixth house of the native, as one will find incompatibility or may even be poisoned by medication.

Natives with planets in this house may have a lack of self-esteem, be plagued by guilt, or seek the approval of others. All these negative emotions affect the health with nerve related ailments, blood sugar problems, and intestinal disorders.

Benefic planets ruling this house or benefics in this house show better health, while malefics afflict the mind and body. The sixth house in a broad sense governs disease, especially if there are planets in it at birth. It particularly rules the abdomen, belly and intestines, food affecting conditions of health, healers and physicians. The sixth house also rules aunts and uncles, servants, persons in employ, kindred on the father's side, small animals and pets of the native.

**AFFLICTIONS:** Hereditary diseases, general ill-health; abdominal disorders.

**HEALING COLOR:** Aquamarine

**EMPOWERMENT COLORS:** Black, amber, scarlet, brown, dark blue

### **ARIES on 6th HOUSE ♈ on 6**

The sixth house deals with careers, routines, and health. The native's obligations to others as well as himself/herself appear in this house. Work will prove to be demanding and there is the tendency that the native may become a workaholic and concentrate much energy on his/her job. In this house of food the native is prone to "eat on the go". These people

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

may get hungry suddenly, and for this reason are prone to eat many convenience foods, as they have no patience for preparation. As a result their health suffers. This sign also indicates a craving for protein and the native may eat too much meat. Eating fast also paves the way for putrefaction from undigested food. These individuals must learn to chew food slowly and thoroughly.

**PATHOLOGICAL TENDENCIES:** Disorders and weakness of the head and those parts ruled by Aries--brain, cerebral nerves, mouth, hair, skull, blood vessels of the cranium, upper jaw; high blood pressure, skin rashes, fevers; putrefaction, dysbiosis, autointoxication; lymphatic stasis.

**FOOD ALLERGY TENDENCIES:** Allspice, barbecued and spicy foods, fried foods, garlic, ginger, onion, radish, tea, wine. These foods should be checked by electroacupuncture, bionutralizer, applied kinesiology, or by cytotoxic testing.

### **MARS in 6th HOUSE ♂ in 6**

Mars in the sixth house, when well-aspected, indicates a quick, energetic native who is likely to rise to a prominent position in his/her employment. It indicates mechanical skills, and many of these natives are inventors, surgeons, machinists, engineers, builders, and skillful hobbyists. This position increases the vitality and detoxifying powers when the native is sick. This influence of Mars also suggests enthusiasm for maintaining health and physical fitness. If Mars is afflicted in this house there is potential for troubles and quarrels with other employees or employer. Should the person be in the position of the employer, he/she will be at variance with employees and subject to loss by theft and dishonesty because of them. An afflicted Mars in the sixth house also gives a liability to fevers and inflammatory diseases, danger of burns, scalds and gun-shots and accidents sustained in the course of employment. These individuals must guard against high blood pressure, fever, headaches, and stress.

**AGGRESSION LESSON:** In no area of life is the emotion of anger of more danger to one's life and health. The native must come to terms with the frustrations of life, learn to breathe properly and regulate the flow of thought.

**PATHOLOGICAL TENDENCIES:** Gluttony, shallow breathing, catarrhal enteritis; blemishes; bladder problems; injury at birth; genital infections (especially in Scorpio, Libra, Gemini); rheumatism; high blood pressure from stress; headaches; risk of accidents involving fire, gun-shots, inflammatory disease.

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

PSYCHIC PURIFICATION: Hypertension: Long, unresolved emotional problems need to be set free. The native would benefit from Photo Cognitive therapy.

Gluttony: Improper breathing shuts off the sensations of the stomach. The native must learn how to breathe while eating.

#### **MARS square SATURN ♀ □ ♃**

Mars square Saturn can indicate a selfish, violent, harsh and cruel nature, quick tempered and vindictive, prone to dishonest and unscrupulous behavior. There is liability to public disgrace and imprisonment, and in some cases to accident and violent death. These individuals have the tendency to be impatient and pessimistic but can learn to apply their energy to areas that will uplift their souls. The native may have a fear of self-assertion, sex, or taking risks in these life areas, which the person may try to compensate for by exaggerated behaviors of sexual activity or ambition. The assertive or instinctual energies may be disciplined by dedication to a highly specialized form of work or occupation.

PATHOLOGICAL TENDENCIES: Blood dyscrasias, clots, hemorrhaging, bleeding gums, anemia; arthritis; loss of hair, premature graying; adrenal fatigue, underweight, lack of proper growth. These natives suffer from impure blood, poor circulation, diseases from carelessness, and are thus liable to cancer.

NUTRITIONAL ASPECTS: Deficiencies of folic acid, essential fatty acids and assimilation of calcium, poor absorption of iron, B-12 and folic acid; increased needs for bioflavonoids and vitamin C.

BENEFICIAL FOODS: Green leafy vegetables, oranges, broccoli.

KARMIC TENDENCIES: Given to treachery; nasty temperament, rebellious of authority.

#### **MARS sextile URANUS ♀ ✕ ♃**

Mars sextile Uranus indicates an energetic and ambitious disposition able to cope with great difficulties under trying circumstances. Natives with this configuration are naturally inventive, intuitive, and successful in bringing their ideas to realization. This aspect is one of the marks of the pioneer of the Aquarian age, where science, electronics, aviation and invention will extend in far-reaching directions. Logic and reasoning is already present in the subconscious mind.

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

**KARMIC TENDENCIES:** Occupations with scientific endeavors or the occult.

### **VENUS in 6th HOUSE ♀ in 6**

Venus in the sixth house indicates natives that prefer to work with others than alone. They are pleasant and tactful and help to settle disagreements in the work place. It gives the native faithful employees who will work for their interest if he is an employer. If he is an employee, it will make him well liked by his employers and fellow workers. It is a fairly good position for health provided the person does not abuse it as the constitution is harmonious, but not very strong. If the health is guarded with care it will remain in good aspect for life, but a little abuse may turn the scales the other way and make the person an invalid. If it is afflicted by Mars, Uranus or Saturn, the native must be more cautious about their health and may experience misunderstandings between themselves and employers and co-workers. Vocations that attract them are related to health, beauty, literature, law and marriage counseling.

**PATHOLOGICAL TENDENCIES:** Disease from high living; bowel disease from dietary indiscretions; swollen abdomen; skin disease; anorexia; hair loss.

### **VENUS conjunct MARS ♀ ♂**

Venus conjunct Mars is considered either a good aspect or bad aspect according to the matter under interpretation. Venus indicates a moderation of the Martian rudeness, making the native more kind and polite. But the conjunction also creates a potential for one to be overly sexual, especially when the conjunction is in Scorpio or Leo, or the fifth or eighth houses. In Pisces or the twelfth house, the native is apt to be self-indulgent or self-abusive. The native may be quite attractive to others as it indicates warmth in the aura. Therefore, the sign and house position must be studied for a more in depth interpretation of this aspect.

**PATHOLOGICAL TENDENCIES:** Phlebitis, obesity, hair loss; fibroid tumors; impotence; diseases due to negligence and pursuit of pleasure; reduced libido due to nutritional deficiency; adrenal fatigue; premature wrinkling of skin, keloids, scars from burns; arteriosclerosis.

**NUTRITIONAL ASPECTS:** Deficiencies of vitamin E and essential fatty acids (vitamin F--linoleic and linolenic acids), folic acid, selenium, vitamin B12, niacin (B-3), iron, molybdenum. The native should moderate the craving for sweets.

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

**BENEFICIAL FOODS:** Brown rice, wheat germ, green leafy vegetables, kidney beans, raisins.

**KARMIC TENDENCIES:** Given to sensual pleasures, self-indulgent; liable to be led astray in female nativities; subject to many temptations along moral lines; death by fire.

### HOUSE 7

The seventh house is closely related to the sign Libra, and thus marriage and partnership; the husband in a female nativity, and the wife in a male nativity are also related. This house shows the test of functional cooperation and participation between individual and society. Function suggests purpose, both inherent and potential, in man or woman. Purpose is only revealed as one operates within the group or global economy. It is the field of human experience in which the person can be most basically transformed and can gain freedom. Planets in this house reveal compelling pressures and motives for destiny. In such cases, individuals may find themselves driven to enter into certain types of relationships as part of their destiny.

While the first house represents how the native appears to others, the fourth house shows how the native sees himself or herself, the seventh house represents how others appear to the native. It represents those whose lives touch the native and how the native responds. If the house is unoccupied by planets, he/she is comparatively free of the influence of others in most of his/her affairs. These individuals do pretty much as they please, but it also means others do not generally help them either. The affairs of this house are always related to the area of another house where the ruler of the sign on the seventh cusp lies. If there are one or more planets in this house, the native is consciously dependent on others in some respect and other people tend to control his/her affairs. Natives with planets in this house may find it difficult to "stand on their own two feet." They feel accomplishments need to come through other people or their partners or spouses. The Sun located here is also indicative of good health.

**AFFLICTIONS:** Brain disorders, diseases of the hamstrings, flanks, bladder, small intestines and navel, the kidneys, haunches and loins, diseases of the womb.

**HEALING COLOR:** Blue

**EMPOWERMENT COLORS:** Browns, dark colors, crimson, green

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

The seventh house also denotes the type of physician or healer required in health matters. It is important that the healer is compatible with the native, depending on the illness. One should avoid healers who have Saturn on the Ascendant or sixth house of the patient. The following signs of healers may be found useful:

Chiroprapist: Gemini, Virgo and Pisceans are especially adapted to this work.

Chiropractor: Geminis and Capricorn are skilled with touch and working with the spine.

Colon therapists: Those born under Virgo and Scorpio.

Dieticians/Nutritionists: Virgo is the sign which rules these matters.

Massage Therapists: Healers born under Scorpio bring strong magnetism.

Hydrotherapists: Healers using mineral waters born under the Sun sign Pisces, and Capricorns making good managers of spas.

Medical Doctors: Those with strong influence of Scorpio and Mars, e.g. in the first or sixth house; the Sun trine or sextile Jupiter at birth; the Moon in Taurus, Gemini, Cancer, Sagittarius, Capricorn or Pisces and well aspected with Mercury; Virgo in the sixth house; the Sun signs Virgo or Scorpio.

Naturopaths: Those born under Virgo and Scorpio.

Nurses: Sun sign Scorpio; those born under rule of the Moon; the sixth house well aspected at birth; Jupiter well aspected in Pisces or the 10th house (Virgo ascending or Sun sign is not favorable for nursing as they can be too negative or critical, and are susceptible to take on the disease of others).

### **ARIES on 7th HOUSE ♈ on 7**

The seventh house deals with other people in the native's life, particularly those that attract attention as well as direct personal relationships. When Aries is ruling the seventh house, the native attracts outstanding people who tend to motivate others into action. When inviting energetic people into relationships, these natives must be aware that they are apt to also attract a number of confrontations.

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

### **MERCURY in 7th HOUSE ♃ in 7**

Mercury in the seventh house and well-aspected makes the person popular in literary and scientific circles. It is a good position for public speakers and those in public relations. But if Mercury is afflicted, the seventh house position may bring a great deal of hostile criticism of a public nature and is liable to involve the person in litigation either to defend himself against libel from others or an account of libel committed by himself. A well-aspected Mercury in the seventh house indicates a successful marriage to a relative or an employee, but when Mercury is afflicted it is possible that either the person or the marriage partner is of an unhappy nature and quarrelsome, and may be unfaithful. If afflicted, the native must be careful before signing contracts and entering into marriages and partnerships.

**PATHOLOGICAL TENDENCIES:** Generally of good health except if on the cusp. Brain disease, lumbago; blemishes.

**PSYCHIC PURIFICATION:** Lumbago: Lack of financial support from the partner. The resolution is to trust the process of life, and all that is needed will appear.

### **MERCURY sextile SATURN ♃ ✕ ♄**

Mercury sextile Saturn indicates serious natives that possess depth and concentration which is of inestimable value in life. Their forethought and profound reasoning abilities insure success in whatever vocations these people may pursue. Their patient persistence permits no failure to stand in the way of ultimate success. Therefore they generally become prominent in connection with some serious enterprise such as secret societies, the church or even politics or governmental affairs. They are in demand for high positions and great undertakings. They are quiet, subdued and serious in their manner and their tidiness extends into their health and hygiene.

### **MERCURY square PLUTO ♃ □ ♇**

Mercury square Pluto indicates a native with strong will power. These individuals exhibit a straightforwardness. They may use harsh speech and words when they "tell it like it is" and for this reason sometimes create resentment and enemies.

**PATHOLOGICAL TENDENCIES:** High strung temperament, possibly with heart problems, thyroid insufficiency; multiple sclerosis; constipation or sluggish peristalsis.

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

**NUTRITIONAL ASPECTS:** Severe deficiencies of thiamine; deficiencies of the B complex in general, calcium and magnesium.

**BENEFICIAL FOODS:** Whole grains, broccoli, turnip greens, tea.

### HOUSE 8

This house, its cusp, and the planets located in it, indicate how a person can best approach opportunities and the resistance involved in bringing relationships into a fruitful situation. These relationships can mean marriage, partnerships, and business associations. The second house refers to private assets, or what can be used to actualize one's birth potential. The eighth house deals with business contracts and agreements that are legally binding. The eighth house field of experience deals with trust, management, and responsibility. The second house deals with personal management, whereas the eighth house deals with proper management of business assets, profits and losses. It indicates where binding agreements will bring legacy. With such a native, emotional scarring tends to be hidden. These individuals have a burning need to purge themselves of past memories which brutally punish their bodies for years. Many succumb to chronic ailments around the ages of 42 to 49 years old. With the background of this emotional insecurity, they push hard for overt success, only for their bodies to become affected by the pressure.

If the eighth house is unoccupied by planets, the native takes emergencies in stride and usually faces crises with appropriate action. If the house is occupied, eighth house matters are of serious concern for the native. These matters may take the form of handling other people's money, dealing in antiques, archaeological findings, etc. The eighth house also indicates the end of physical life, the surrender of the soul, the time and manner of death. The planets in this house at birth indicate the quality of death. Benefics here indicate an easy and natural death. Malefics in this house tend to a more sudden, accidental or even violent death.

**AFFLICTIONS:** Kidney disorders, genitourinary infections, adrenal insufficiency, poisoning.

**HEALING COLOR:** Green

**EMPOWERMENT COLORS:** Gray, black, brown, red, mahogany, green

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

### TAURUS on 8th HOUSE ♉ on 8

In the eighth house we look for the possibility and effect of extraordinary changes that might intrude on the native's life and the inner strength that he/she might possess to cope with the challenge. Taurus ruling the eighth house gives the native the opportunity to profit materially from all major changes and enables him / her to draw wealth from sources unknown to others. Their inner strength comes from the soundness and stability of their material resources. These individuals do not seek change and evaluate a change by its material advantages and disadvantages. They should caution against financial loss through marriage, jealousy and sexual disease.

### SUN in 8th HOUSE ☉ in 8

The eighth house is the position through which death dealing forces act, and as the Sun is the giver of life, this position is detrimental to one's vitality, and can bring a promising life to an early termination if its factors are ignored. As the second house signifies the financial condition of the person and shows what he/she does with money, the eighth house shows what comes from one's own efforts, by inheritances, and the wealth of the marriage partner. Therefore the Sun in the eighth house shows an increase of wealth after marriage but also a tendency of the mate to be overly generous and squander the money. If afflicted by Jupiter or Venus, there is danger of losing the inheritance. The middle part of life will be critical. If malefics afflict and their energies are not dealt with by the native, the passing into the higher life will be sudden. Their passing may also be an honorable death due to some self-sacrifice or heroic deed.

**PSYCHOLOGICAL TENDENCIES:** Sun in the eighth house indicates those whose ego is bound to their sense of their own self-worth, having little need for self aggrandizement.

**PATHOLOGICAL TENDENCIES:** Hemorrhoids, skin problems and eruptions, kidney and colon toxicity.

**PSYCHIC PURIFICATION:** Skin problems, eruptions: Buried problems, feeling threatened. The resolution is to forgive the past and at this moment feel free.

**Hemorrhoids:** Anger of the past and not letting go of resentments and misfortunes. The resolution here is to release all that is not love, then you will find the time and space for those things you desire to accomplish.

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

Constipation: Refusing to release the old ideas and misfortunes of the past. The resolution here is to release the past and let the new vitality and life enter.

**SUN trine MOON ☉ Δ ☾**

Sun trine Moon indicates general success in life and health, with fair financial conditions. The native has good home surroundings with faithful friends, and esteem in the community. The native is likely to rise in life because of innate abilities, and gain recognition from people in position, or it may impel him or her to carry on to succeed in their own way. They are able to communicate their thoughts effectively and spontaneously. There is also a strong survival force and one that dispels disappointment in life.

NORMERGIC TENDENCIES: The native generally enjoys a long life.

**SUN trine NEPTUNE ☉ Δ ♆**

Sun trine Neptune favors the spiritual faculties and intensifies the spiritual vibrations in the aura. Many people with this configuration have providential luck, as it is said they live in the presence of angels for good deeds they performed in past lives. In others it fosters a love of the occult which leads them into the spiritual world. It suggests those who are prone to have highly developed intuition. However, they can lack ambition and miss opportunities that come their way presenting gains in spiritual or artistic growth.

NORMERGIC TENDENCIES: Psychic powers which benefits the vitality.

**URANUS in 8th HOUSE ♅ in 8**

Uranus in the eighth house is a good omen, for it indicates that when life has been lived to its fullest, the end will come suddenly and the native will be spared the long and painful suffering of prolonged illness. It is prudent such people have their house in order, so that when the end comes their loved ones are not left with a messy probate. People with Uranus in this position often have interest in metaphysics and become well versed in mysticism. It also indicates a predisposition to dreams and psychic experiences. This position, when well-aspected, often brings an unexpected legacy through the marriage partner. These individuals may also have unpredictable or unorthodox attitudes and behavior when it comes to sex. It also suggests those who may devise ingenious or unorthodox methods for handling debts, taxes, and insurance. This position is indicative of worry and annoyance regarding inheritance or

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

property left by inheritance.

PATHOLOGICAL TENDENCIES: Liability to violence, accident, heart trouble, paralysis or some peculiar nervous disorder or kindred ailment.

## HOUSE 9

Experiences and the tests related to the ninth house are those periods encountered by the individual in order to find the meaning of things. The act of knowing belongs in the third house because it implies mere contact with the immediate environment. It is knowledge derived merely from sensations. The ninth house relates to understanding, a far more complex process which involves synthesis of many factors and data. The German term "gestalt" applies to the ninth house as a type of knowing, understanding, and referencing holistic experiences derived from mystical and philosophical inquiry.

The ninth house is the house of symbols and words. Symbols have to be interpreted. The natal chart is a set of symbols relating to the location of planets and stars at the time of birth. It symbolizes the complex relationship existing between the native and the universe. Likewise, all religious concepts and mystical visions are symbolic of man-to-universe relationships. To speak of a "God Experience" is a typical ninth house activity -- a unity which the person projects and in which he asks for answers for all his conceivable needs.

The danger one faces in ninth house experiences is over-expansion caused by ambition and greed for power and power symbols, such as money. Ambition is the negative aspect of this house, leading to compulsive egocentric relationships that use other people for power or prestige. Knowledge is used to achieve power. It is this type of knowledge our society holds in high esteem. Ours is a society imbued with competition and ambitions, worshipping success and power with no concern for the environment and health of society as a whole. Thus, the relationships become destructive and inharmonious to a wholesome life. In such a society, the mind is used as the instrument of success. Group relationships translate into compulsive cooperation, mandated actions, and forced taxation. It implies twisting the laws, natural as well as political, so they become tools for gathering wealth. This is the mind of the politician, the corporate leader, the scientist in search of inventions and discoveries for personal fame.

If the house is unoccupied by planets, the native finds it easy to accept certain philosophical principles or religious beliefs, and there is no resistance to understanding higher principles. If the house is occupied,

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

of a parent. Patience and persistence when confronted with problems in higher education or legal problems, are the keys to overcoming them. Breathing exercises, e.g. hatha yoga, chi-kung, will balance and stabilize the mind.

**PATHOLOGICAL TENDENCIES:** Ill-health from travel, sea sickness; unbalanced mentality, shallow breathing.

**PSYCHIC PURIFICATION:** Anxieties: Not trusting the flows and processes of life. The resolution is to approve of yourself and trust life's processes as righteous opportunities.

### **SATURN square NEPTUNE ♄ □ ♆**

Saturn square Neptune indicates a native that may be liable to loss by deception, treachery or fraud. There is a sense of wrong timing of the course and events of life. One may focus on wrong or irrelevant issues resulting in unfulfilled goals. This aspect may indicate a morbid tendency with fears, anxieties, and phobias stemming from the subconscious. These natives may suffer from inferiority complexes or have fears of inadequacies.

**PATHOLOGICAL TENDENCIES:** Susceptibility to lead, beryllium, mercury or cadmium poisoning; cancer; liver torpidity and allergies; sensitivity to drugs and antibiotics; spinal disorders, subluxations; neurosis, neurasthenia; phobias; adenoids, swollen lymphatic glands and stasis; asthma. Susceptibility to colds and flu. This aspect may also indicate chronic, long-term ailments or genetic/hereditary weakness.

**NUTRITIONAL ASPECTS:** Deficiencies of pantothenic acid, calcium, vitamin C & bioflavonoids.

**BENEFICIAL FOODS:** Broccoli, yogurt, green leafy vegetables, citrus fruits, strawberries.

**KARMIC TENDENCIES:** Suicide; confinement due to mental illness; psychic possession.

### **HOUSE 10**

In the tenth house an individual meets experiences which result from his/her successes or failures in gaining social, public or professional position. He/she is integrated, or fails to become integrated into the social collective and public status in the community. It is one's "office" which defines one's standing in the community. First house potential becomes

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

drastically change their professional activities.

**KARMIC LESSON:** Be patient with your work and live within the rules, as this will enable you to enjoy success at a later time. There is a need to transform one's attitudes towards worldly success, authority, and reputation. This might require a long and painful re-evaluation of one's true motives and values.

### HOUSE 11

In the eleventh house, the power of society, as a collective or group, is released through the individual. The power is released through the activities the individual performs within the social unit such as in their profession, church, club, fraternity, etc. Success is seen as pleasurable in the social environment as his/her work and prestige unfolds. The experience gained in the tenth house makes it possible to set new social objectives, new professional goals, or to relax in the company of one's peers or fellow workers. This house has much to do with an individual's attitude toward achievement and social success. It is the way a person makes use of either achievement or failure, which establishes his/her self-worth. Success or failure brings into question the way one lives, feels, and acts and thus has great influence on the health of the native. Success as well as failure must be used wisely, significantly, and creatively. Regression therapy can do much to undo the patterns that led to failure, or perceived failure can be unfolded into a new dynamic.

If the eleventh house is unoccupied, the native does not consciously need friends to share his/her wishes or hopes. Those who have planets in the eleventh house always work best within groups united for a common purpose. The eleventh house is affiliated with Aquarius and rules the legs, calves and ankles.

**AFFLICTIONS:** Heart function; injury or disease of the legs, calves and ankles; blood impurities.

**HEALING COLOR:** Red

**EMPOWERMENT COLORS:** Sky blue, orange

### VIRGO on 11th HOUSE ♍ on 11

The capacity and need for friendship and the effects of these contacts on one's perspective are shown by the eleventh house. Virgo ruling the eleventh house indicates the native finds friends that are conscientious. These natives take duties seriously and are critically oriented. Afflictions

Body & Soul for Roger Corrigan Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

in this house indicate friends that may use the native for their own benefit. It also indicates a native that may be introverted or eccentric.

#### **JUPITER in 11th HOUSE ♃ in 11**

This position indicates, when well-aspected, honorable, wealthy and influential friends who will help the native in the realization of his hopes, wishes and ambitions. It also indicates a sociable disposition and fondness for refined pleasures, friends, children, and social contacts. When Jupiter is favorably aspected, the marriage will be fruitful and the children will be a credit to their parents. If the eleventh house of the partner's horoscope is afflicted, then this judgment must be modified. When Jupiter is adversely aspected to Uranus, Saturn, Mars or Mercury, the native will attract parasitic friends who lack abilities, and after using good contacts to their own advantage, may become envious and secretly work for the native's downfall. It also indicates those who find it difficult to be content, always wanting more than they have. These individuals may constantly owe friends money.

PATHOLOGICAL TENDENCIES: Varicose veins.

#### **JUPITER square URANUS ♃ □ ♅**

Jupiter square Uranus indicates an impulsive nature liable to act in a sudden or unexpected manner. If not tempered this may result in loss by speculation, lawsuits or impulsive extravagance or many changes of occupation, residence, and friends. These individuals can be deliberately confrontational and stubbornly entrenched in antagonistic modes. They tend to go all out on new endeavors only to suddenly abandon them. Their friends may find them inconstant and unreliable. These natives may engage in eccentric religious beliefs, mysticism, or occultism. This is an aspect of many of the so-called mystics and gurus.

PATHOLOGICAL TENDENCIES: Weight fluctuation; when the native is under stress there can be tics, spasms, twitches and cramping.

NUTRITIONAL ASPECTS: Deficiencies of zinc, manganese, choline, inositol, biotin, B-6 and pangamic acid.

BENEFICIAL FOODS: Whole grains, beans, spinach, broccoli.

KARMIC TENDENCIES: Loss by speculation, urges for travel and adventure.

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

## HOUSE 12

At the twelfth house, the sky comes to an end, as one has performed his social or professional work in the eleventh. It is described as the house which closes the human cycle of life. In the twelfth house we meet the results of our passive acceptance of that which was, or our spiritual rebellion that helped make a new world. We face the karma of society in a subconscious manner, or we face the karma of individuals who fought society for selfish interests, or for the sake of a better world.

The collective power of memories are witnessed in the twelfth house. What is called karma may be so great that it stifles the individual identity of the newborn, or drowns out the rhythm of a new cycle of the man facing the probability of rebirth. This results in the new cycle, becoming no more than a repeat of the last cycle. According to ancient Indian philosophy, the last thought held in death determines the pattern of the future incarnation. One of the stranger characteristics of our linear, Western society is its inability to think in terms of cyclical processes. Such a denial can be traced to a religious decision of the Council of Constantinople in the 5th century A.D. which prohibited the belief in reincarnation and other factors that began the era of the dark ages.

The twelfth house relates to sorrow, disappointment, loss, misfortune, anguish, solitude or confinement, hidden fears and worry. It is considered by some as the house of restrictions and limitations, and detrimental spiritual or psychic conditions of the native. It is related to the sign Pisces. Its placement suggests the best way to deal with one's ghosts and products of the subconscious. Just as a shadow is eliminated by focusing lights on it from a number of different directions, ghosts and shadows of the subconscious will vanish when subjected to the light of understanding and compassion. This process is utilized in past life regression therapy.

If this house is unoccupied by planets, the native is generally not consciously confronted with its implications. He does not live in fear and accepts and works within the framework of his destiny. Not everyone in life is confronted with the spiritual issues of the twelfth house. Many indeed pass through life facing the material consequences of their conscious ambitions as revealed by the tenth house. If the twelfth house is occupied, the native has some matters to confront and work out as shown by the houses ruled by the occupying planets. The sign on the cusp of the twelfth shows the general tempo of inner spiritual matters in the native's life. Planets here indicate forms of introversion with emotions that build up until some form of illness manifests. Talking about their feelings through past life regression is the best remedy for twelfth house individuals. They need to learn that harboring envy, jealousy, and hatred

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

invariably brings disease and misfortune. The karmic law applies.

**AFFLICTIONS:** Autoimmune disorders, reduced thymus functions from negative thoughts, afflictions, pain or injuries of the feet, lymphatic congestion, worry, brooding, despair and despondency.

**HEALING COLOR:** Lemon

**EMPOWERMENT COLORS:** Green, blue, white

### **LIBRA on 12th HOUSE ♎ on 12**

The sign on the cusp of the twelfth house shows the general tempo of the native's inner spiritual values and motivations in life. These subconscious values and tendencies support the affairs and people in the native's life. Those with Libra ruling the twelfth house are very sensitive and regard their relationships very seriously. Libra ruling the twelfth house indicates natives that are somewhat inclined to regard misfortune as being someone else's fault and unlikely to happen to them. The Libra attitude is to "pass the buck" when the chips are down. Matters are not favorable for getting to the root of deep problems of the native.

### **NEPTUNE in 12th HOUSE ♆ in 12**

Neptune in the twelfth house indicates those with hidden vulnerabilities, and those heavily influenced by dreams, feelings of guilt, and the problems of the past. There is also the potential that their spouse may suffer from a mysterious illness or hypochondria. When well aspected, it brings success in scientific or clandestine research, psychic abilities or a vivid imagination with artistic talent. The native should find activities that relate to health practices and positive mental attitudes. The native must directly confront any negative situations, learn from them, let them go, and move forward with determination. For them the past can impose severe burdens on the present, as well as the future, if they let it.

**PATHOLOGICAL TENDENCIES:** Chronic illness; anxiety; perverted tastes; tobacco habit.

### **MOON in 12th HOUSE ♀ in 12**

This position denotes a life in which restrictions and limitations play a prominent part. It favors success in such work as is performed in seclusion, prisons, asylums, hospitals, charitable institutions, or in any remote, quiet, obscure place. This is the ideal position for the monastic life. If the Moon is not in Capricorn or Scorpio, and is well-aspected, it shows

Body & Soul for Roger Corrigan      Ogden, UT  
Born on May 21, 1945 at 5:46 pm MWT Placds TRP

development and progress, particularly through the occult arts. When placed in Cancer or Pisces and in conjunction, square or opposition to Neptune, the mystical and mediumistic side of the nature usually dominates the person. On the other hand, if the Moon is in benefic aspect to Neptune, Uranus, Mercury, Mars or the Sun, the native will be able to summon his innate powers, and investigate at will the unseen forces. There is also a liability to become involved in clandestine love-affairs, but if the Moon is well-aspected the person will be able to keep this a secret. If the Moon is afflicted there is danger of secret enemies, trouble and persecution.

**PSYCHOLOGICAL TENDENCIES:** The native must directly confront any negative situations, learn from them, let them go, and move forward with determination. For them the past can impose severe burdens on the present, as well as the future. The native should find activities that relate to health practices and positive mental attitudes.

**PATHOLOGICAL TENDENCIES:** Ill-health in females; proneness to hospital confinement; swollen feet, edema; melancholy, insomnia; deformities; weak eyesight.

**PSYCHIC PURIFICATION:** Edema: People you will not let go of. The resolution here is to release the past, find new associations and let the old contacts pass away.

**Insomnia:** Not trusting the process of life. The resolution here is to trust tomorrow and the flow of life will take care of itself.

**MOON square SATURN** ☾ □ ♄

Moon square Saturn is one of the signatures of sorrow in life. The native is apt sometime to experience melancholy, worry, gloom and disappointments in his/her life. These individuals will make more enemies than friends and become subject to slander and scandal if selfishness and avariciousness overpower their respect for others. The adverse aspects of Saturn square the Moon are not favorable for the health, particularly in a woman's horoscope. It indicates obstructions of the female functions. In the man's horoscope it may deny marriage or indicate the loss of the marriage partner.

**KARMIC LESSON:** Fear of expressing what one truly is; fear of criticism, of being wrong, or of inadequacy leading to inhibitions. One must take risks in self-expression or embark on new modes of life in order to truly realize what one is capable of doing. One's self image must be transformed into new ways for achievements and strengths, rather than

reliving past errors, faults, or limitations.

**PATHOLOGICAL TENDENCIES:** Susceptibility to parasites; lymphatic stasis, obesity; spinal disorders and subluxations; speech impediment; skin disease; diseases due to anguish, anorexia; cramping and irritability before menstruation (PMS), scanty or irregular flow; bone disease; digestive diseases, achlorhydria, catarrhal diseases; pernicious anemia, weak blood; a cold constitution and general ill-health; sluggish peristalsis/constipation; shallow breathing; rheumatism; peculiar symptoms when diseased.

**FOOD ALLERGY TENDENCIES:** Beets, cheese and dairy products, vinegars. It is recommended to have these foods checked by electroacupuncture, bionutralizer, applied kinesiology, or by cytotoxic testing.

**NUTRITIONAL ASPECTS:** Deficiencies of calcium, bioflavonoids, vitamin C, potassium, vitamin B-12.

**BENEFICIAL FOODS:** Broccoli, yogurt, turnip greens, citrus fruits, bananas.

**KARMIC TENDENCIES:** Death by accident (by falls, contusions, from heights); death by drowning (in water signs Cancer, Scorpio, Pisces); secret sorrows, melancholy, selfishness, miserliness, rude, a mean disposition (especially in females).

#### **MOON trine URANUS** ☾ △ ♅

Moon trine Uranus indicates great originality and independence of the mind, one that is quick, intuitive and vivid in its imagination. The native has inventive capability and may be endowed with hypnotic or magnetic powers. There is often the ability to study and practice astrology. The person will make a success of electricity or electronics as a vocation. This aspect also indicates a peculiar fascination for the opposite sex which may lead to a clandestine love affair or an unconventional union. There is spontaneous business ability with inventive enterprise. The home may have had unusual parents or circumstances. The natives are seekers of new and unusual experiences.

#### **MOON conjunct NEPTUNE** ☾ ♆ ♃

Moon conjunct Neptune indicates strong psychic faculties particularly if placed in the psychic signs of Cancer or Pisces. It also indicates those who can become victims of their own emotions and have irrational fears

that hinder decisive action. The native is apt to be insecure but oblivious to danger, especially concerning water and drugs. The native is very impressionable, can be mediumistic, or even psychic having prophetic dreams, deja vu, etc. This aspect also indicates a weak and leaky aura that is easily sapped of its vitality by other people, by fear, or even nature spirits. The native should get regular and frequent doses of pure sunlight to harden the etheric body.

**PATHOLOGICAL TENDENCIES:** Susceptibility to parasites, lowered vitality and resistance; diseases due to carelessness; lymphatic stasis, obesity; shallow breathing; alcoholism, drug abuse/addiction; psychosomatic ailments; extreme sensitivity to drugs; vaginitis, leucorrhea, cystitis, lymphatic stasis, cancer, leukemia.

**NUTRITIONAL ASPECTS:** Deficiencies of potassium, pantothenic acid, riboflavin; protein-salt overload, the native benefits by drinking distilled or reverse osmotic water and avoiding salt.

**BENEFICIAL FOODS:** Bananas, green beans, peanuts, spinach, mushrooms.

**KARMIC TENDENCIES:** Death by drowning (in water signs Cancer, Scorpio, Pisces); unnatural and chaotic behaviors and appetites; strong psychic powers, religious experiences.

**MOON sextile PLUTO ☾ ✕ ♇**

This aspect indicates a strong perception that brings regeneration of these natives' emotional lives as well as their domestic affairs. If other aspects are favorable, this is a good indication that they will possess good health and much energy. These individuals are able to let go of the past and find new opportunities.
