

The Magical Child Art Charts

Here are child-like versions of the twelve zodiac signs that Maria Kay Simms first drew as illustrations for her book *Your Magical Child*. Later the art in full color became an option for **Art Charts** through Astro's chart service, and Maria also adapted her book text for an interpreted report. Since then, the *Your Magical Child report* and **Art Chart** have become popular choices as gifts for new Moms.

Now, the **Art Chart** designs have become even more colorful, and we also have decorative **Art Prints** for a child's room, and colorful **Note Cards** that could accompany a baby gift, or might be used for thank you notes or a shower invitation. Look for these options on this website, too! Magical Child Art Products include greeting cards and colorful art prints, matted and ready to frame for a child's room. Then, of course, there's the book—now in Expanded 3rd Edition!

Magical Child Art Charts or Art Prints are \$9.95 for the print only.
Either chart or print can be ordered matted and ready to frame for \$25.95

Matted prints, with backing, come in a clear protective sleeve and fit into any standard 11" x 14" frame. Below are the chart centers for each sign. Outer rings are as shown above, each color coordinated to its center.

YMC-1 (Aries)

YMC-2 (Taurus)

YMC-10 (Capricorn)

YMC-11 (Aquarius)

YMC-12 (Pisces)

As you can see, liberties have been taken with some signs to increase their child-like appeal, and because Maria, in designing them, thought of each as potentially a soft toy or perhaps an "Astro-Pet." So, for example, instead of a Maiden, the Virgo "pet" became the Unicorn that, according to myth, comes tamely to a Virgin...or, in the poem, "comes tamely to the the Virgo born." Poems beneath each chart or picture explain the sign symbol.
