

WINNING OVERVIEW FOR Roger Corrigan

INTRODUCTION

The WINNING OVERVIEW shows aspects of transiting planets to points in the natal chart. The planet on the left is transiting; the point on the right is natal.

THE BIRTH DATA IS USED; IT IS NOT RELOCATED. The times of the planets' transits are shown IN THE TIME ZONE OF RESIDENCE. Should you want us to use a time zone other than that of your return address, please specify it.

The report switches between Standard Time and Daylight Time each year on the dates established by U.S. law. For areas such as Arizona and Hawaii, which do not use Daylight Savings Time, the customer should request the "NO DAYLIGHT TIME" option. "STANDARD" or "DAYLIGHT" will appear at the top of each page. The month and date when the change occurs are clearly shown.

The WINNING OVERVIEW is used to pick the days for which to order the daily WINNING TRANSITS, that is, days on which there are "+" aspects which are not cancelled by simultaneous "-" aspects. ONE MINUS CANCELS ANY NUMBER OF PLUSSES.

For more information on WINNING, see Joyce Wehrman's booklet entitled "WHAT ARE WINNING TRANSITS?", available in the "All About Astrology" series from Astro Computing Services or ACS Publications.

For instructions on marking up the OVERVIEW, ask for the free flyer by Jim Shawvan entitled "HOW TO USE JOYCE WEHRMAN'S WINNING OVERVIEW AND WINNING TRANSITS". This flyer is included with each copy of the booklet by Joyce Wehrman.

Winning Transits use different orbs for applying and separating aspects. The applying orb (while the aspect is getting closer to exact) is 15 minutes of longitude, while the separating orb (the aspect is moving away from exact) is only one minute of longitude. This means that the time of exactitude and the time of ending are nearly simultaneous. For this reason, ending times are normally not shown in the report. Start times of aspects are indicated by an "s" between the aspect and the time; exact times are indicated by an "x" if both bodies are direct, or an "r" if one is retrograde. It may happen that an aspect is formed, then one planet changes direction and ends the aspect before it becomes exact. In this case only, the ending time is shown with an "e".

Only exact times are given for Moon aspects, since the Moon moves so fast, and there is no letter between the aspect and time (that many x's would just clutter up the report).

-> denotes an ingress, meaning the planet on the left entered the sign on the right at that time.

Moon Quarter Symbols:

- New Moon
- ☾ First Quarter
- ☽ Full Moon
- ☾ Third Quarter

The quarter and sign of the Moon are shown first thing each day. There are four possibilities. First, the Moon may be in the same quarter and sign all day, which is shown by Moon Quarter Symbol IN Sign. Second, the Moon may be in the same quarter all day, but enter a new sign, which is shown by Moon Quarter Symbol -> Sign. Third, the Moon may enter a new quarter while staying in the same sign all day, which is shown by Moon Quarter Symbol AT Time after the Moon Quarter Symbol IN Sign line. Fourth, the Moon may enter both a new sign and a new quarter, in which case there will be a Moon Quarter Symbol -> Sign line and a Moon Quarter Symbol AT Time line.
